All,

I looked over the proposed rules. EPA HQ agrees that the proposed changes will satisfy the OSDS inspections condition.

Jayne/Don--

I looked over the proposed rule changes and they look good to me as far as addressing OR's remaining OSDS condition goes. Since EPA is the technical experts, I'll let you have the last say and provide feedback back to Randy.

Hello,

This went out last week.

DEQ is proposing rule changes to Division 018 & 071 and would like your input. The comment period will end October 19th at 5 PM. For information on how you can comment, attend a public hearing, please read the rulemaking announcement.

The rule changes will include some housekeeping and correcting some errors. Substantive rule changes proposed include:

Amend

- Time of transfer septic system inspections with reporting requirements
- Alternative treatment technology product approval process to include annual fees and reporting
- Fee schedule to include compliance recovery fees for violators
- Site evaluation reports to expire ten years from rule adoption or issue date
- Definition of maintenance to allow some system components to be replaced without a permit

Repeal

- ETA systems from the rule and site evaluation confirmations

For more information, please visit DEQ's home page (http://www.deq.state.or.us/wq/onsite/onsite.htm) to view the draft rules, announcement, and the proposal.
