Re EPA-HQ-OPP-2016-0385

I am a mother and grandmother. I work with special education kids, and there are more and more of them every year. I am alarmed that glyphosate is so prevalent in our bodies, lakes, rivers, the air and soil. I have a degree in Plant & Soil Sciences. I am not ignorant of how glyphosate works. It is truly a poison and has no place in agriculture, nor in weed control by local, regional, state and federal agencies. It needs to be banned, since it is most likely a carcinogen. Please do not approve it again. It should never have been approved in the first place.

Thank you
