General Comment

As a mother to two small children, I'm very concerned about what is in the food we eat, the water we drink, the air we breath, and the vaccines we inject into children.

As a mom to a toddler with multiple life-threatening food allergies that presented when he was a baby, I have been sick to learn about the chemicals in our vaccines and food supply. I remember thinking why is his body reacting to something safe like food, which made me ask maybe the food isn't safe. This isn't right and I want change and I want it quickly. Our innocent children are suffering.
