---

Those documents were sent by Megan. Unfortunately, most of the dissolved metals sample locations were not included. Take a closer look at DG216, pages 1-3, which list all sample locations supposedly being analyzed for both total and dissolved. The supporting data forms are not in the subsequent pages.

Sincerely,

Sabrina Forrest

I was able to locate the validated data report and I have forwarded it to Sabrina.

Somehow this document was not included in the draft ARR.

Subject Dissolved Metals data for Cement Creek/Animas

All, Katharine Lima with CSC is helping me with technical support. She identified the lack of data forms and validated data for the majority of the dissolved metals results from surface water sampling information Megan sent me on CD, which I forwarded to CSC. Barry is trying to help me out, but I want to be sure that START can find and forward to me ASAP all the dissolved metals data for ALL aqueous samples collected. Also, please confirm that they were validated and forward those reports.

I apologize if I have this somewhere, but I cannot locate it in what Megan sent me.

(See attached file: validation DG214.pdf)(See attached file: validation DG216.pdf)
