Belated thanks for this, which I overlooked previously. I'm glad Nina came to a conclusion eventually on p. 26. It's my understanding that Nina taps into students at Lewis and Clark Law School students for a lot of her prodigious output, and this letter (which is mostly a technical survey of amphibians--complete with color photos!) certainly reads like a college paper with some introductory front matter and a conclusion stuck on at the end.

Subject: Fwd: OR CZARA and Type N Stream Protection

FYI--The latest letter from Nina. She's concerned that OR's current practices are not adequate for protecting amphibians in non-fish bearing streams. The temperature standards OR is using are only for salmonids and don't consider amphibian needs. She asserts that OR must establish practices and issues enforceable orders to timber operators to ensure protection of amphibians in non-fish bearing streams as part of mid-coast TMDL they are developing per settlement agreement.
