Attachments: 08-13-2015 Ltr to Quincy Stykes from HAAP.pdf; RE: Title V Permit Renewal -Notification/ Holston Army Ammunition Plant

Alan,
Can we get together to discuss Holston? We are trying to get a copy of the following document: "Alternative Treatment Options for Open Burning of Explosive Waste at Holston Army Ammunition Plant, (ERDC/EL TR-12-8), March 2012." As seen by the attached email, Holston has not been very forthcoming.

Any more ideas on who to contact? There is also another document mentioned in the attached Adobe document. We would also like to get a copy of the latest document.

Any advice or assistance where you can help would be appreciated. Thanks!

Terri

Hi Terri,

I was just reading through this memo again and was wondering if we could get a copy of the results from Phase one. The memo notes that phase one of the four phases was placed on contract with HSAAP operating contractor on June 30, 2015. Phase one was to be 12 months and seeks to quantify the explosive waste streams by performing waste characterization, Material Potentially Presenting an Explosive Hazard, and determination of the amounts of materials currently being processed by OB. I was thinking that it would be great if we could get a copy of the findings for this, as it would help verify/update the numbers we pulled from BRS. Seeing that the 12 month period may be coming to a close soon, do you think we would be able to get the results from TDEC (when available)?

FYI: Army is feeling the heat and hesitantly moving forward with alternative technology considerations at Radford AAP, VA and Holston AAP, TN.

Terri,

We should send this to the Subp X WG also.

Hi, Terri

I do not have a copy of the letter you are looking for in my files. Since, I was not the only permit writer (he retired) on this project in 2012 I have asked the File Manager to research Division's records. I would like a copy also. If that is not fruitful, I will request the Division of Air Pollution Control (APC) to search also. I have attached a letter from 2015 indicating APC has been working on alternative treatments for open burning at Holston for some time. It may take a couple of days to trace it.

Hi Al,

I was wondering if you have a copy of the following document. Do you know if it was sent to EPA? I am looking for a copy of the document. Any information that you have would be helpful.

"Alternative Treatment Options for Open Burning of Explosive Waste at Holston Army Ammunition Plant, (ERDC/EL TR-12-8), March 2012."

Thanks!
Terri
