Thanks, Jonathan. I corrected the date to February 15. I lost track of February for some reason. Hard to believe it's already mid-February.

Jim

Thanks, Jim.

Not a big deal, but I think you mean February 15th (instead of January 15th) for the updated comments.

Subject: Summary of call with Nancy Rumrill on February 10, 2017, Re Excelsior Permit Application and Florence Copper Permit

Hi Kate,

I called Nancy for clarification on the format and content for the updated Cadmus comments on the Excelsior response to previous EPA comments on the application. We will update the comments to reflect the changes proposed by Excelsior during the three conference calls with Excelsior and ADEQ held since January 24th. Our updated comments are due by **February 15th**.

We also briefly discussed key issues related to the Florence Copper permit appeals, including alert levels at supplemental monitoring wells and whether exceedances at those wells would be considered violation of water quality standards. It was concluded that those exceedances would be considered a cause for remedial action but not a permit violation unless an exceedance were detected beyond the area of review or beyond the vertical aquifer exemption zone.

Thanks,

Jim
