Subject: PEBBLE MINE FEIS -water quality re: FISH Appendix K4.24

Good morning,

I'm wondering if folks might have time in their schedules to review and comment on the proposed Pebble Mine water quality appendix (attached) related to potential impacts to fish?

If you are able to do that I would very much appreciate receiving your expert reviews by EOB this Friday, August 31.

I am more than happy to incorporate the comments with the other fish-related ones associated with the FEIS review to meet the process deadlines.

Thank you very much!

Betsy
