Mr. E. G. Solomon
California Regional Water Quality Control Board
101 Centre Plaza Drive
Monterey Park, California 91754-2156

Subject: San Gabriel Valley Cleanup Program – Groundwater Monitoring For Newly Discovered Chemicals, Baldwin Park Operable Unit (BPOU)

Dear Mr. Solomon:

In response to your letters dated September 24, 1998 and January 14, 1999, Earth Tech on behalf of Chemical Waste Management sampled five wells on February 4 and 5, 1999 for four chemicals, perchlorate, 1,4-dioxane, N-nitrosodimethylamine (NDMA), and methyl tert-butyl ether (MTBE). Two additional laboratories were subcontracted to obtain the detection limits requested in your January letter, specifically, the detection limits for 1, 4-dioxane and NDMA were 2 ug/l and 0.033 ug/l respectively. The detection limits for perchlorate and MTBE were acceptable and remain the same, 4 ug/l and 10 ug/l respectively. A summary of the results is attached. This is the second and last requested sampling event; no other sampling events are scheduled. If you have any questions regarding this submittal, please call me at (303) 914-1454.

Sincerely,

Lori T. Tagawa, P.G.
Manager, Closed Sites

c: Wayne Praskins, EPA Region IX
