I thought it went well, too. I don't think there's anything here that is going to raise any flags, red or otherwise, related to ORD. A big part of this is laying out the need for a decision regarding the next report, but we can't come out and say as much in the current report.

On the climate thing, I agree. I need to craft an email to this guy, who I think is honestly trying to figure out how to let his colleagues know that this isn't a scam. I understand Bruce's view of things to an extent. Those guys get so caught up in the DC fog that there isn't any way to think of things in a different way.

I'll work on letting Foutch know that there is concern about perceptions in a way that doesn't put Bruce in a bad position. Foutch seems to be someone who would avoid presenting that in a negative way, but I know he's going to raise the issue. My guess is that it will move forward at some point.

I think it went well. Where ORD goes from here vis Yamada's thoughts I don't know. I think he got the message. Bruce of course is a challenge. He has some bleeding heart tendencies… As for the oilman inquiry, Bruce may be right in the race to press perspectives on this seemingly honest interest and Re/Blue team issue. If it goes to Pruitt and back down to the Dubey Bro Bruce and Bob, then they can re-initiate whatever. You needn't be standing in water holding a wire.
