Subject: Enhanced Evaporation Pilot Test Progress Report
Enhanced Evap Pilot Progress Report 061016.pdf

Jeryl,

Please find the attached progress report. The next report will be submitted by August 11, 2016.

Overall, the system operation has gone pretty smooth. We haven't experienced any plugging of the heads and these hot dry days have been good for evaporation. By the next report we will have enough data to start talking about the overall system performance.

Regards,
Taurus
