Thanks Angeles. I look forward to seeing the Q&A.

I think the commitment by EPA on an EI is advisable regardless of whether it is required or not. It is a good idea. I'd like to continue that part of the discussion in parallel.

We are regrouping after yesterday's meeting tomorrow afternoon. I will touch base with you then on what I can with regard to next steps. Hard to summarize with so many levels involved at this point.

Thanks for resending the documents you prepared. Harry and team are working on Q&A's and we should have something to share by the end of this week.

Regarding a "commitment from EPA to complete a Superfund Environmental Indicator..." within a certain period of time, I would like to learn more about what you mean. The site isn't on and/or proposed for NPL listing or a SAS yet... I want to make sure we don't get too far ahead of ourselves. We have a lot of other data we can use to develop our messages and FAQs.

How was yesterday's meeting? Any progress you can share?

Thanks.

Angeles

Additionally, in order to address concerns about exposures, I think EPA should commit to completing a Superfund Environmental Indicator Human Exposure Under Control determination within a certain period of time.

I had made this suggestion to Roberta Blank at a public meeting several years ago and she indicated this wasn't required at non-NPL sites. We should revisit this.

Angeles and Harry,

Attached are two older documents that contain some of the themes and messages we talked about today with respect to an overall communication strategy.

We look forward to seeing EPA's draft. I'll let Dave Emme know that EPA anticipates providing something next week.

Greg
