General Comment

docket identification (ID) number EPA-HQ-OPP-2016-0385

As parents and grandparents, as well as a Doctor of Chiropractic, we urge that the FDA, NIH, CDC and vaccine makers immediately test all batches of all vaccines for glyphosate based herbicides and toxic pesticides and recall contaminated products. In the meantime and until there is a clear scientific resolution of this issue, there must be a moratorium on all and any vaccine mandates, with revocation of such laws where they have already been passed. No parent should have to knowingly vaccinate their infants and children with a known neurotoxin, probable carcinogen, cardiovascular damaging chemical, reproductive effector which causes liver and kidney damage.

We request that the EPA, FDA, NIH and CDC to do a formal investigation into the widespread contamination and likely harm caused by glyphosate, test for the contamination of pesticides in all consumer products including vaccines, halt the mandate of vaccines. Additionally, we request that the EPA immediately change their policy to require long term full formulation safety testing with full disclosure labeling and revoke the license of glyphosate to prevent further contamination.

Please rescind the license for production of Round-up glyphosate.
