Enrique, sorry we haven't connected yet. Are you in the office tomorrow? I was thinking that Doug Ammon and I might call and catch up. Let me know – thanks - Dana

Hey Betsy:

At some point, we should compare notes on BP/ARC and our respective Anaconda sites. Maybe we can have a side bar in Philly. I think we're dealing with some of the same individuals at ARC (unfortunately it sounds like some of those folks were hit hard in Houston).

Here's an update we just provided Kell and other HQs colleagues on our Nevada Anaconda site. The state has asked for a deferral of a final listing and we are engaged in fairly intense negotiations with them, ARC and two affected tribes.

We're also engaged with the them on another abandoned mine site in CA – Leviathan – and embarking on a LEAN like process with them.

Feel free to give me a call any time before our Philly meeting.

Enrique

Hello Kell

When we last spoke, I mentioned my staff would put together an "Anaconda Issues Update" document to keep you apprised of the progress in negotiating and finalizing all the multiple documents between the interested parties in order to eventually support Nevada's proposal for deferral. It's all a somewhat complex web of documents and interactions so the Update document is a bit dense. But we've tried to make it as concise as possible with a focus on critical and threshold issues are pending. I will use it to keep you posted on progress and send you an updated "ISSUES UPDATE" the day before our biweekly calls.

Like I mentioned, the issues are not easy to reconcile but we will be working hard over the next several weeks with all the parties to help them focus on the primary issues that need resolution now versus issues that can be dealt with later as part of the CERCLA like process going ahead.

Please let me know if the Update format can be improved for you and your team.

Thanks

Enrique
