General Comment

QUIT poisoning us! No more GMOs full of glyphosate; it is in our soil, water, air, vaccines and bodies.Diabetes, allergies, obesity, cancer, leaky gut are common diseases in the USA now-people are SICK. Our quality and the length of life has declined in the past 20 years. That is how long you have allowed us to be doused in poison. Enough. Now illegal diacamba has ruined crops in 10 states; and you must know the horrible harm that it caused to millions of vets and people...yet you are going to allow this in our food chain too? Do your job! You already know from leaked documents that Monsanto knew years ago that glyphosate causes cancer. Please put an end this now and protect citizens like you are supposed to.
