Re: April 2010 Monthly Status Report, Gulfco Marine Maintenance Site, Freeport, Texas

Dear Mr. Miller:

Pursuant to Section XII, Paragraph 53 of the amended Unilateral Administrative Order (UAO) for the above-referenced Site, Pastor, Behling & Wheeler, LLC (PBW) has prepared this monthly status report on behalf of the Respondents LDL Coastal Limited LP (LDL), Chromalloy American Corporation (Chromalloy) and The Dow Chemical Company (Dow). As discussed in our telephone conversation on August 2, 2005, monthly status reports for a given month will be submitted by the 15th of the following month as required in Paragraph 53 of the UAO, rather than by the 10th of the following month as indicated in Appendix 1 of the Statement of Work (SOW) attached to the UAO. In accordance with the UAO requirements this report addresses the topics listed below:

1. Actions which have been taken toward achieving compliance with the UAO during the previous month – The following actions were taken during the previous month:

   - Risk Assessment activities (SOW Paragraph 37) detailed under Task 7 of the RI/FS Work Plan, including: (1) preparation of a Final Screening-Level Ecological Risk Assessment (SLERA) Report (to be submitted by May 4, 2010) based on EPA comments on a March 10, 2010 revision of that document as provided in your letter dated April 14, 2010; and (2) preparation of a Final Baseline Ecological Risk Assessment (BERA) Problem Formulation (PF) Report and Final BERA Work Plan and Sampling and Analysis Plan (WP/SAP)(both to be submitted by May 11, 2010), based on EPA comments on March 10, 2010 drafts of those documents as provided in your letter dated April 14, 2010.

2. Results of sampling, tests, modeling and all other data (including raw data) received or generated by or on behalf of Respondents during the previous month – The following data were received or generated during the previous month:

   - Analytical reports for accumulated water samples collected from the aboveground storage tank (AST) tank farm containment areas on April 6, 2010 were received from the laboratory. These reports and an updated validated

database containing these data are provided in electronic form on the enclosed DVD.

3. Actions, data and plans which are scheduled for the next two months and other information relating to the progress of work – The following actions are planned for the next two months:

   - Respond to EPA comments on reports as submitted and referenced in Item Number 1 above.

4. Information regarding percentage of completion, all delays encountered or anticipated that may affect the future schedule for completion of the work required, and efforts made to mitigate those delays or anticipated delays – RI/FS activities are approximately 80% complete.

Although not required by the UAO, the Respondents listed above have been working with EPA to finalize an Administrative Settlement Agreement and Order on Consent for Removal Action (Removal Action AOC) for tank removal activities at the former tank farm area and repair of the former surface impoundments cap. A final Work Plan for that Removal Action was submitted to you on April 20, 2010. In support of the possible discharge of accumulated water within the tank farm containment area to the nearby Intracoastal Waterway, an Industrial Wastewater Application Abbreviated Technical Report was submitted to the Texas Commission on Environmental Quality (TCEQ) on April 27, 2010.

In a letter to you dated April 23, 2010, Respondents proposed to perform wetland sediment hot spot remediation activities as part of the above removal action and requested a meeting to discuss that proposal. The meeting will be held on May 17, 2010. A draft work plan detailing the proposed wetland sediment remediation activities was submitted to you via e-mail on April 29, 2010. Draft language to allow performance of the proposed wetland sediment hot spot remediation under the Removal Action AOC was also submitted to EPA via e-mail on April 29, 2010. Depending on the scope and timing of the final Removal Action AOC, other actions relating to the progress of work as required in Item Number 3 above may be performed during the next two months.

Thank you for the opportunity to submit this status report. Should you have any questions, please do not hesitate to contact me.

Sincerely,

PASTOR, BEHLING & WHEELER, LLC

CASE NARRATIVE

Client: Pastor, Behling, &Wheeler **Report:** 210040819

Gulf Coast Analytical Laboratories received and analyzed the sample(s) listed on the sample cross-reference page of this report. Receipt of the sample(s) is documented by the attached chain of custody. This applies only to the sample(s) listed in this report. No sample integrity or quality control exceptions were identified unless noted below.

VOLATILES MASS SPECTROMETRY

In the SW-846 8260B analysis for analytical batch 429375, the MS/MSD recoveries and RPD are not applicable for 2-Chloroethylvinyl ether because the acidification of the samples affects the recovery of this compound. The LCS/LCSD recoveries are acceptable for this compound.

SEMI-VOLATILES GAS CHROMATOGRAPHY

In the SW-846 8081B analysis for 429184, the MS/MSD exhibited recovery failures in a similar manner. This can be attributed to matrix interference. All LCS/LCSD recoveries and RPDs are acceptable. The samples were concentrated to 5 mL rather than 10 mL in the extraction process. The spike concentration is therefore at the upper range of the calibration curve. The concentration for several compounds is slightly above the high level standard and is flagged E, estimated on the form 1s.

In the TX 1005 analysis, the recovery for the surrogate is above the upper control limit for sample 21004081901 (NORTH CONTAINMENT). No TPH was detected in the sample; therefore the data is reportable.

METALS

In the SW-846 6010B analysis for prep batch 429143, the MS/MSD recoveries and RPD are not applicable for Calcium and Hardness because the sample concentration is greater than four times the spike concentration.

CONVENTIONALS

In the SM 2540 D for analytical batch 429234, the RPD does not apply because the determined concentration of the sample and/or duplicate is less than 20X the reporting limit. Standard methods requires 5% precision when the concentration is greater than 20X the reporting limit.

Laboratory Endorsement

Sample analysis was performed in accordance with approved methodologies provided by the Environmental Protection Agency or other recognized agencies. The samples and their corresponding extracts will be maintained for a period of 30 days unless otherwise arranged. Following this retention period the samples will be disposed in accordance with GCAL's Standard Operating Procedures.

Common Abbreviations Utilized in this Report

ND	Indicates the result was Not Detected at the specified RDL
DO	Indicates the result was Diluted Out
MI	Indicates the result was subject to Matrix Interference
TNTC	Indicates the result was Too Numerous To Count
SUBC	Indicates the analysis was Sub-Contracted
FLD	Indicates the analysis was performed in the Field
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
RDL	Reporting Detection Limit
00:00	Reported as a time equivalent to 12:00 AM

Reporting Flags Utilized in this Report

J	Indicates an estimated value
U	Indicates the compound was analyzed for but not detected
B	(ORGANICS) Indicates the analyte was detected in the associated Method Blank
B	(INORGANICS) Indicates the result is between the RDL and MDL

Sample receipt at GCAL is documented through the attached chain of custody. In accordance with ISO Guide 25 and NELAC, this report shall be reproduced only in full and with the written permission of GCAL. The results contained within this report relate only to the samples reported. The documented results are presented within this report.

This report pertains only to the samples listed in the Report Sample Summary and should be retained as a permanent record thereof. The results contained within this report are intended for the use of the client. Any unauthorized use of the information contained in this report is prohibited.

I certify that this data package is in compliance with the NELAC standard and terms and conditions of the contract and Statement of Work both technically and for completeness, for other than the conditions in the case narrative. Release of the data contained in this hardcopy data package and in the computer-readable data submitted has been authorized by the Quality Assurance Manager or his/her designee, as verified by the following signature.

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
M1- Compound response manually integrated because Target system did not integrate.
H - Operator selected an alternate compound hit.

QC Flag Legend

A - Target compound detected but, quantitated amount exceeded maximum amount.
M2- Compound response manually integrated because Target system integrated incorrectly.
