---

Jennifer:
Attached is a proposed agenda for our meeting on September 20 at HDR's offices. As discussed during our June meeting, the CPG will forward early next week a memorandum that identifies a reduced list of potential COCs for calibration for the Region's modeling team to review. As we discussed during the August 24 bioaccumulation modeling meeting, the CPG is requesting the Region's final actions required for approval on the COPC Mapping using Conditional Simulation which we last met on during our April 2016 meeting.

Please let me know if you have any questions or comments.

Thank you.
