Thanks Brandon. As you may imagine, we're a little backed up here, so I haven't yet had a chance to review the documents. I'll be in touch if I have questions or need anything else.

Subject: USEPA Documentation Request

Ms. Bush:

Regarding the facility at 3259 East 100th Street, KCBX understands that you have requested test results for visible emissions, PM, SO2, CO, NOx, VOM and moisture for the last 3 years. Attached are two opacity reports and one moisture test report. Please note that the opacity reports were prepared as an internal best management practice and not pursuant to a permit term or condition. Also note that I have redacted any customer names from these documents.

You have requested annual reports for the last 3 years regarding section 13.b.ii. For your convenience, I have included the current permit for your reference since 13.b.ii references annual reports in a prior permit which the current permit has replaced. KCBX assumes that you are requesting documents related to section 17.b.ii of the current permit. As such, the 2012, 2011 and 2010 Annual Exception reports are attached.

You have requested moisture content records which you will find attached for 2013, 2012 and 2011.

Finally, you have requested deviation reports per section 20a. KCBX assumes that you are requesting section 21a of the current permit. This section requires that the permitee submit a report to Illinois EPA if there is a deviation from or exceedance of permit requirements. KCBX has not submitted an exceedance report per section 21a in the past three years.

Sincerely,
Brandon Walker
