Subject:	PM10 sites for SE Chicago
Date:	Tuesday, November 12, 2013 9:04:21 AM
Attachments:	PM10 monitoring SE Chicago.pptx

Hi Nathan- See attached. Given prevailing winds from the SW, W, and NE, we should probably put PM10 continuous monitors SW and NE of each petcoke location to capture upwind/downwind. I've proposed a few locations on the map. This is kindof tricky, given that I don't know the property boundaries – I'm assuming that you will not ask the company to put monitors on adjacent facility property (?) – in some cases a good location was across the river on another site.

Any comments appreciated (incl. IEPA). Let me know if/when you'd like to discuss.
