Bonnie

Find attached the site pictorial showing the locations of the monitors we discussed.

To update you with current conditions we are cooperating with the Attorney Generals office to respond to there request to empty the site. As of this date 12/18/2013 all Pet Coke is removed from the site. It was removed by ship and went back to Arcelor Mittal. All IRM , and bark are removed from the site and was removed by truck .The stone and quartz has been used onsite to maintain the site as was its intended purpose. There is remaining about 25,000 tons of Met Coke on site. 9,000 tons will go out by barge over the next two weeks also back to Arcelor Mittal. the 16,000 tons left will go out either by ship in mid January or be trucked off before Feb.28 per order by the Attorney General.
