Subject: RE: Latest Development - WaterGen Offering Assistance in Houston

Good morning all - Jay Garland heard back from the director of ORD's National Homeland Security Research Center Greg Sayles who stated that FEMA is responsible for delivery of emergency water, so it would be best for Watergen to coordinate their offer of assistance through them rather than EPA. Chris Impellitteri responded to my email this morning stating the same. Jay and I spoke with Ed Russo and Yehuda this morning and informed them of this.

Ardra Morgan
Deputy Director
Systems Exposure Division
National Exposure Research Laboratory

Subject: Latest Development - WaterGen Offering Assistance in Houston

Per the correspondence below, Water Gen is offering to send one of their units to Houston. Based on my, admittedly limited, knowledge of the ethics rules, I don't believe the agency has the authority to accept gifts from non-federal entities such that Water Gen could "donate" one of their AWG units to the EPA. I do remember from my from former life in DoD, there are circumstances in which an agency can procure (actually purchase) products or services without having to go through the normal competition process (unusual/compelling urgency and national security for example - FAR part 6.3) - not sure if EPA has ever evoked these exceptions however.

But before we declined such an offer, I wanted to make sure I checked with this crew. Jay also forwarded the offer to the director of our National Center for Homeland Security.

Subject: Re: Good Morning

Thanks for reaching out; always good to try to make a difference in times of crisis.

Not sure what's feasible directly through EPA authority (Ardra may have some more detail to provide). I will forward to our Homeland Security coordinator to see what might be possible, including linking up with other agencies and their authorities.

Will take to you tomorrow
