Rover climate methane indirect effects language - JW.docx

Hi Amiee,

Re: Justin's below email: I wanted to give you a heads-up that R5 will be forwarding the EPA R5/R3/R4 comment letter re: FERC's DEIS for the Rover-Trunkline-Panhandle Projects (MI, OH, WV, PA, IN, IL, TN, MS) sometime tomorrow (Friday, April 1, 2016) afternoon for HQ approval. Letter is due at FERC on or before April 11, 2016.

Thank you, Virginia

Virginia,

I updated the language I sent yesterday with the comparisons language.

I think the headers work as they are (however they need to be formatted for your letter), not for cumulative.

I pasted the language I was referring to into my question in the doc here.

Ex. 6 - Personal Privacy

be back on Tuesday morning. As you know, our management has requested review of this letter, so if you have a version to share before I return, please send it to Aimee Hessert and copy myself.

Thanks for your coordination!

Justin Wright

Please send me the exact language tailor to this EIS.

Also, do you want all of your comments in the letter enclosure under: "Cumulative Impacts"?

Thank you.

Just remembered I'd also like to add our language about comparisons to national, global, or state emissions. I'll get that to you tomorrow if you don't already have it.
