Subject: RE: EPA status update: Haskell Lake Petroleum Contamination

Kristen,

Because a good deal of what EPA will do hinges on the work that the state is doing, I believe we need to coordinate among the three parties. I think it makes sense to set up a regular meeting/call on the Haskell lake project so that we can be more regular in our communication. That way everyone will know what is going on and we can just settle into doing the work.

My next step is to reach out to WDNR on this. I have already reached out to John Robinson to begin setting up a December meeting. John indicated that he would like to have as much data in hand when we actually meet. I think we all could benefit from getting results distributed so that we can analyze them in advance of a 3-party meeting.

Let me see what I can set up. At this point it will be difficult to schedule something the week of Thanksgiving. I suggest that we set up a call the first week in December when Bob is back from much deserved vacation. We can use that time to update you and discuss our plans. If we can get WDNR involved in that call or a subsequent one, I believe we will be more productive.

Let me know what you think of this.

Subject: EPA status update: Haskell Lake Petroleum Contamination

Good Afternoon Sherry,

During our last call, we were able to provide a Tribal Update and Concerns, but did not get a chance for EPA updates and forward planning (see tracking matrix). Could we schedule a call for EPA status updates including cost recovery,

overview of completed work, and planned work/timeframes.

Kristen
