Hi Erik,

Please see the attachments to this email, which include:

- CALPUFF, POSTUTIL, CALPOST input and output files for Brame Energy Center and Teche Power Station
- Ozone files
- Model executables

Let me know if you need anything else.

Thanks,

.....

Hi Jennifer,

Thanks for the modeling report. I had two initial follow-up questions about modeling files. The 114 requested all input and output files for each part of the CALPUFF modeling (CALPUFF, POSTUTIL, and CALPOST). Will you be providing these by email, ftp, or other media? Our email system strips any attachments with a '.zip' extenstion, so the ozone files did not come through. Can you rename the file with a '.zzz' extension and I can change on this end. This would potentially work for the CALPUFF system files if the files are less than 25 MB.

Thanks,

Erik

Erik,

Please look this over and let me know by Thursday 8/2 whether they have provided everything you need. (completeness review)

Subject: Cleco Corporation - Refined Screening Modeling Report

Guy and Vivian,

On behalf of Cleco Corporation, Trinity is submitting the refined screening modeling report for the BART applicability screening analysis (attached), as requested in the May 19th Section 114(a) Information Request Letter. Also attached to this email are three ozone files (for Appendix A) that contain background hourly ozone data utilized in this refined modeling analysis:

- ozonedata01_v2.dat
- ozonedata02_v1.dat, and
- O3_2003_v3.dat

If you have any questions, or need anything further, please let me know.

Thanks,

.....
