Subject: RE: work plan comments and private well sampling contractor

Good Afternoon Bob,

I reviewed REI's soil investigation proposal (attached).

The proposal offers a small amount of soil data that may be useful, but the density in the source area is not likely to support a source soil degree and extent determination. We will not limit nor delay the scope of work. As mentioned in the call today, the Tribe expects to be notified in advance of work and be present when site work performed. I appreciate that EPA echoed the site presence concern.

We will continue to work with EPA toward our mutual goal of determining the degree and extent of contamination, assessing the site, and cleanup actions. This includes

1) Determine the degree and extent of source soils

2) Determine the degree and extent of groundwater contamination

3) Determine impacts to Haskell Lake and the pond

4) Determine ecosystem impacts

5) Determine extent of contamination into bedrock

6) Interim Remedial Actions

7) Remediation to Tribal Cleanup Standards

Sincerely,

Kristen Hanson

Kristen,

Please send me your comments whenever you are ready. I will be available every day this week, so if we need to discuss anything further, please give me a call.

It was good to hear that DNR has many of the same concerns as we do on the plan. I hope they are able to get a quick turnaround from REI on a revision.

My contractor has identified a firm to perform the Haskell Lake private well samples. They are CWE from Weston, WI. Please let me know if you have any concerns about this firm.

Thank you,

Bob
