Subject: RE: Tower Standard Service Proposed Work Plan

That will work for me. I will check with Kristen. How does 1 p.m. sound?

The work plan seems straight-forward, so it won't take long to develop comments. Assuming this work gets started by early August, will the next phase (well placement) occur in fall?

Thanks.

Thank you, John.

I will coordinate with Kristen. After I look at the plan, it might be helpful and save time to have a call so we can discuss comments before we submit in writing. I don't see any problem with meeting the date you noted.

I look forward to project start-up.

Regards,

Bob

Subject: Tower Standard Service Proposed Work Plan

Bob and Kristen

Attached is the proposed scope of work the Department received from REI associated with the investigation at the Tower Standard Service Site (BRRTS #03-64-127889) in Lac Du Flambeau. Please note that the Department has not approved the work plan which calls for initial round of soil boring to be followed by the installation of additional monitoring wells. We have a number of concerns over the proposed scope and would appreciate your taking a look at it and providing us with any comments or questions by July 17th. It would be helpful to receive a coordinated response from EPA and the Lac Du Flambeau Band. Please let me know if that time frame works for you or if you have any questions.

We are committed to service excellence.
