Subject: Corps Relief Well Channel Release (UNCLASSIFIED)

Classification: UNCLASSIFIED
Caveats: NONE

Kris & Paul,
The Corps has reviewed the EPA/NDDOH proposed action to remove the barriers in our relief well channel, which will effectively release water that has been contained since the Red River Supply explosion. The Corps concurs that this is a reasonable course of action. Proceed with the action as proposed and continue to coordinate release monitoring and restoration efforts with the Corps. Thanks, Will
