Subject: RE: Correction: Haskell Lake Tower Standard Project - Draft Field Workplan for the Pilot Test (Attached)

Hi Michael,

In order to expedite review of the pilot study work plan, please provide the following:

1) Map showing locations of proposed excavation, wells and work activities

2) Current version of the Work Plan (see below)

3) Technical materials and Statement of Work provided to Tetra Tech

I was unable to discern any differences between the provided work plans (One sent on September 19, 2017 and the one sent on September 20, 2017) .

If the September 20th version has changes, please highlight the changes.

Thanks,

Larry Wawronowicz

Subject: Correction: Haskell Lake Tower Standard Project - Draft Field Workplan for the Pilot Test (Attached)

Dear President Wildcat:

I am providing an update on the Haskell Lake Tower Standard Project as our team continues to move forward on the activities for source control at the Site.

Per my September 8th email, I am sending you, Larry, and Beverly the Draft Field Workplan for the Pilot Test that Tetra Tech sent us on, September 19, 2017.

We are currently reviewing this Draft and noticed a few corrections and additions we have on the document, including the fact that the timeframes are longer than we directed. While we understand that your resolution precluding communications among staff is still in place on this matter, we are available to have a conference call anytime this week with your Technical Staff to discuss your comments should you wish to do so before the Tribal Council meeting scheduled for September 25, 2017.

As you are aware, we have a short timeframe within which to provide comments back to Tetra Tech to keep on schedule, pending access.

If you have any questions, please do not hesitate to contact me.

Thank you.

Michael D. Harris
