Projected Tower Standards Site Remediation and PECFA Timeline

August 10, 2017

March 17, 2015

- Tower Standard case reopened under the PECFA program.

July 2015

- EPA starts working with Lac du Flambeau on the Tower Standard site.

July 20, 2015

- No new sites accepted into the PECFA program

August 2017

- Under the PECFA program, WDNR begins preparing a Remedial Action Options Report.
- EPA initiates two task orders:
  1) Task Order to START Contractor to develop an Interim Measure Corrective Measures Study and Cost Analysis (IMCMS/CA) evaluating two potential interim measures, Excavation and Air Sparging/Soil Vapor Extraction (AS/SVE)
  2) Task Order to BERS Contractor to Revise 3-D Images Showing On-Site Contamination

Fall 2017

- Projected installation and deployment of remedial system ("Interim Measure")

Fall 2017-April 2020

- Remedy is operated.
- Two years (8 Quarters) of Groundwater monitoring data is collected.

April 2020

- Final field activities must be completed to allow for reimbursement from PECFA. Closure Package must be submitted by the responsible party in order for WDNR to consider closure under PECFA.

June 30, 2020

- All PECFA claims must be submitted to WDNR for reimbursement.
