Subject: RE: Haskell Lake LIF Project ftp data site

Thank you Kristen for the link.

Tom is out on vacation until September 21.

I looked at the figure and assume that the new dots are your LIF spots so far. I am glad to hear that you are getting some NAPL location information, which should be a good addition to the data from the MiHPT. Any information that you can add to what Bristol reviews regarding source geometry will help with their evaluation. I will pass your message on to them.

Hope all goes well today.

Subject: Haskell Lake LIF Project ftp data site

Good Evening Tom and Bob,

I am behind sending out a thank you for meeting with me in late August. I appreciate your time.

LIF work took place today and work continues tomorrow. Dakota has set up a ftp site for the project. Data should be uploaded this evening. The linked address is in the email below.

For reference, I attached a field map.

It looks like we found napl.

Any thoughts or guidance is appreciated.

Kristen
