Steve,

Can we answer Mike's question about LEPC role and responsibility?

David

David -- Hey, this question of what LEPCs are required to do is getting urgent. Channel 8 is evidently telling state legislators that McLennan County took federal money to form an LEPC, but didn't do so. My understanding, from your answers and from talking to a couple of environmental groups, is that the county wasn't necessarily required to do anything once it received the risk plan from the fertilizer plant.

I absolutely don't want to repeat bad information -- can you help clear this up? In your earlier response, you said the LEPC was required to give people access to the report from West Fertilizer if they asked for it. Was there any requirement for the LEPC to hold meetings, take any action, etc? Was it required to have more than one member, could it exist only on paper?

Yep. I will see what I can find out for you.

I think Q1 is for law enforcement, not epa. Rachel Moreno at State Marshal office may be able to help you.

Q2 it amended the CAA 112r - I have check out changes and date. I don't have a quick summary comparison but will see if one is available.

Q3 - need to double check .

David
