Re: S.H. Bell Company, 10218 South Avenue O
Monthly Data from FEM PM_{10} Monitors and Meteorological Station

Dear Mr. Jones:

In accordance with the Paragraph 1.c of Stipulated Settlement and Final Consent Order, dated December 2, 2016, S.H. Bell Company ("S.H. Bell") timely submits the hourly PM_{10} data for the month of September 2017 from the four Federal Equivalent Method ("FEM") real-time PM_{10} monitors located at the cardinal points of the S.H. Bell facility that have been approved by U.S. EPA (the "September PM_{10} Data").

The September PM_{10} Data shows that daily PM_{10} levels are significantly below the 24-hour average for the National Ambient Air Quality Standard ("NAAQS") for PM_{10}.

The September PM_{10} Data is being provided in an ASCII comma-delimited format and has undergone quality assurance and quality control. Additionally, pursuant to a conference call with U.S. EPA on July 19, 2017, the September PM_{10} Data is also provided in an excel spreadsheet in addition to the single ASCII comma-delimited file.

Please note that the September PM_{10} Data contains the following qualifier codes:

- BA – Maintenance/Routine Repairs (NULL CODE)

Additionally, in accordance with the Paragraph 1.d of Stipulated Settlement and Final Consent Order, dated December 2, 2016, S.H. Bell is submitting the meteorological station data for the month of September 2017. The meteorological data is being provided in an ASCII comma-delimited format as exported directly from the data logger. Should you have difficulty opening this file type, we suggest using Microsoft Excel and selecting "All Files (*.*)" for file type in the "OPEN" dialog box. Once the file is selected from the "OPEN" dialog box, the Import Wizard for delimited file format should appear. Ensure that "delimited" is the selected file type

option and click next to continue on to the next step of the Import Wizard. In this next step, select "comma" as the delimiter and click finish.

Sincerely,

John R. Bedeck
S.H. Bell Company
