Tarjeta de Seguro de Responsabilidad de Texas
Guarde esta tarjeta.

IMPORTANTE: Este tarjeta o una copia de su póliza de seguro debe ser mostrada cuando usted solicite o renueve su:

- registro de vehiculo de motor
- licencia para conducir
- etiqueta de inspección de seguridad para su vehiculo.

Puede que usted tenga también que mostrar esta tarjeta o su póliza de seguro si tiene un accidente o si un oficial de la paz se la pide.

Todos los conductores en Texas deben de tener seguro de responsabilidad para sus vehiculos, o de otra manera llenar los requisitos legales de responsabilidad civil. Fallo en llenar este requisito pudiera resultar en multas de hasta $1,000, suspensión de su licencia para conducir y de su registro de vehiculo de motor, y la retención de su vehiculo por un periodo de hasta 180 dias (a un costo de $15 por dia).

Texas Liability Insurance Card
Keep this card.

IMPORTANT: This card or a copy of your insurance policy must be shown when you apply for or renew your:

- motor vehicle registration
- driver's license
- motor vehicle safety inspection sticker.

You may also be asked to show this card or your policy if you have an accident or if a peace officer asks to see it.

All drivers in Texas must carry liability insurance on their vehicles or otherwise meet legal requirements for financial responsibility. Failure to do so could result in fines up to $1,000, suspension of your driver's license and motor vehicle registration, and impoundment of your vehicle for up to 180 days (at a cost of $15 per day).

This apportioned cab card must be carried in the vehicle at all times

Only one plate issued for a power unit and it must be displayed on front of the vehicle. A windshield or plate validation sticker is not required or issued with this registration receipt.

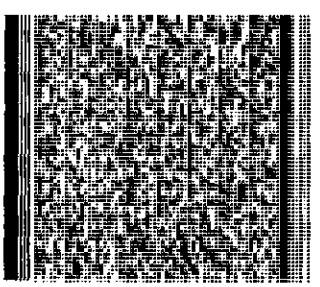
The face of this cab card lists those jurisdictions in which the vehicle described is proportionally registered together with the registered gross weight. At the end of the listing a series of asterisks will appear in the following block. No jurisdictions are to be listed after the block containing these asterisks. Otherwise the cab card is invalid.

Carrier Responsible for Safety
USDOT # 869392
CES ENVIRONMENTAL SERVICES INC
4904 GRIGGS ROAD
HOUSTON, TX 77021

Notice of Federal Motor Carrier safety regulations and materials regulations for owners of the following listed vehicles:

*Vehicles weighing in excess of 10,000 lbs.
*Farm vehicles weighing in excess of 10,000 lbs.
*Vehicles transporting 15 or more passengers
*Vehicles transporting hazardous materials requiring a placard

Payment of required registration fees is a declaration of knowledge that Texas has adopted and enforces the Federal Motor Carrier safety regulations and hazardous material regulations, and it is the obligation of the registrant to be familiar with the applicable requirements.



If this vehicle is sold or otherwise deleted from your fleet, this cab card and corresponding license plate must be surrendered to the Texas Department of Transportation.

OIL AND GAS WASTE HAULER'S PERMIT

(To be completed by the Commission)

Permit No. 3998 **is hereby issued to** CES ENVIRONMENTAL SERVICES, INC.
subject to the conditions below.

PERMIT CONDITIONS

A. This permit authority is limited to the hauling, handling, and disposal of oil and gas waste off a lease, unit, or other oil and gas property.

B. This permit authorizes the permitted hauler to dispose of oil and gas waste only at the following disposal/injection systems:

- Commission-permitted disposal/injection systems for which a Form WH-3 has been submitted and which are listed on Permit Attachment B, Approved Disposal/Injection Systems;
- disposal systems operated under authority of a minor permit issued by the Commission; and
- disposal systems permitted by another state agency or another state provided the Commission has granted separate authorization for the disposal.

C. Each vehicle must be marked on both sides and in the rear with the permitted hauler's name (exactly as shown on the P-5 organization report) and permit number in characters not less than three inches high.

D. This permit authorizes the permitted hauler to use only those vehicles shown on the Commission-issued listing of approved vehicles (Permit Attachment A, Waste Hauler Vehicle Identification).

E. Each vehicles must carry a copy of this permit along with a copy of those parts of Permit Attachment A (Waste Hauler Vehicles Identification) and Permit Attachment B (Approved Disposal/Injection Systems) that are relevant to that vehicle's activities.

F. Each vehicles must be operated and maintained in such a manner as to prevent spillage, leakage, or other escape of oil and gas waste during transportation.

G. The permitted hauler must make each vehicle available for inspection upon request by Commission personnel.

H. The permitted hauler must compile and keep current a list of all persons by whom the permitted hauler is hired to haul and dispose of oil and gas waste and furnish such list to the Commission upon request.

I. The permitted hauler must adequately train all drivers to ensure compliance with Commission rules, including recordkeeping requirements, and adherence to proper emergency response and notification procedures.

J. The permitted hauler must keep a DAILY record of the oil and gas waste hauling operations of each approved vehicle. The daily record, signed and dated by the vehicle driver, must be kept open for Commission inspection and must contain the following information:

1. Identity of the property from which the oil and gas waste is hauled (operator name, lease name and number or other facility name or number, and county);
2. Type and volume of oil and gas waste received by the hauler at the property where it was generated;
3. Identity of the disposal system to which the oil and gas waste is delivered (operator name, lease name and number or system name, well number or system permit number, and county); and
4. Type and volume of oil and gas waste transported and delivered to the disposal system.

K. This permit is not transferable without the consent of the Commission.

L. This permit expires on 5/31/2009. This permit, unless suspended or revoked for cause shown, will remain valid until the expiration date.

UNITED STATES OF AMERICA
DEPARTMENT OF TRANSPORTATION
PIPELINE AND HAZARDOUS MATERIALS SAFETY ADMINISTRATION

HAZARDOUS MATERIALS CERTIFICATE OF REGISTRATION FOR REGISTRATION YEAR(S) 2006-2009

Registrant: CES ENVIRONMENTAL SERVICES INC
Attn: PRABHAKAR R. THANGUDU
4904 GRIGGS ROAD
HOUSTON, TX 77021

This certifies that the registrant is registered with the U.S. Department of Transportation as required by 49 CFR Part 107, Subpart G.

This certificate is issued under the authority of 49 U.S.C. 5108. It is unlawful to alter or falsify this document.

Reg. No: 052506 550 089OQ **Issued: 05/25/2006** **Expires: 06/30/2009**

Record Keeping Requirements for the Registration Program

The following must be maintained at the principal place of business for a period of three years from the date of issuance of this Certificate of Registration:

(1) A copy of the registration statement filed with PHMSA; and
(2) This Certificate of Registration

Each person subject to the registration requirement must furnish that person's Certificate of Registration (or a copy) and all other records and information pertaining to the information contained in the registration statement to an authorized representative or special agent of the U. S. Department of Transportation upon request.

Each motor carrier (private or for-hire) and each vessel operator subject to the registration requirement must keep a copy of the current Certificate of Registration or another document bearing the registration number identified as the "U.S. DOT Hazmat Reg. No." in each truck and truck tractor or vessel (trailers and semi-trailers not included) used to transport hazardous materials subject to the registration requirement. The Certificate of Registration or document bearing the registration number must be made available, upon request, to enforcement personnel.

For information, contact the Hazardous Materials Registration Manager, DHM-60, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, 400 Seventh Street, SW, Washington, DC 20590, telephone (202) 366-4109.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

April 28, 2008

Mr. Matt Bowman, President
CES Environmental Services, Inc.
4904 Griggs Road
Houston, Texas 77021

Re: Transmittal of Class 1 Permit Modification
CES Environmental Services, Inc - Houston
Industrial Solid Waste Registration No. 30900
Industrial Solid Waste Permit No. 39048
WWC Nos. 12143047, 12149729, 12224342-1, 12234282-1
RN100693282/CN600618946

Dear Mr. Bowman:

The Texas Commission on Environmental Quality has reviewed your application for a Class 1 permit modification dated November 6, 2007, received November 7, 2007, and revised April 17, 2008. The modification requests to list in Table IV.B. of the permit, a hazardous waste stream which CES is currently authorized to manage under the waste water treatment unit exemption in 40 CFR 264.1 (g)(6), without a RCRA hazardous waste permit. This waste stream will only be managed in a tank which is part of the waste water treatment system that discharges to a Publicly Owned Treatment Works.

Our evaluation indicates that the information presented is sufficient for a Class 1 permit modification. Transmitted herewith is the modification which is now part of your permit and should be attached thereto. Please note that notice of this modification request must be made as per the requirements of Title 30 Texas Administrative Code Sections 39.403 and 305.69(b)(1)(B) within 90 days after the change is put into effect.

Questions regarding this modification should be directed to me at 512/239-5747. If responding by letter, please include Mail Code MC 130 in the mailing address.

Sincerely,

Vaishali Tendolkar, Project Manager
Industrial & Hazardous Waste Permits Section

ARKANSAS HAZARDOUS WASTE TRANSPORTATION PERMIT

CES Environmental Services, Inc.
4904 Griggs Road
Houston, TX 77021

Permit No. H-1339
EPA ID No. TXD008950461
Date Issued: 08/19/08

ORDER AND PERMIT

It appearing that the above named carrier has met with all applicable provisions of the rules and regulations adopted by the Arkansas Highway Police under authority of the Arkansas Hazardous Waste Management Act, and therefore, is issued a permit from the Arkansas Highway Police to engage in the transportation of hazardous waste in and/or through the State of Arkansas, for a period of one (1) year.

The above said carrier is hereby issued this permit subject to such terms, conditions, and limitations as are now, or may hereafter be attached to the exercise of the privileges herein granted.

It is a condition of the permit that the holder shall comply with all rules and regulations of the Arkansas Highway Police and the laws of the State of Arkansas concerning the transportation of hazardous waste and operation of a motor vehicle over the highways of this State.

This permit does not confer any operating authority to said carrier and shall not be considered as such.

This permit shall terminate one (1) year from the date issued, but may be subject to renewal upon application of the carrier.

Entered this 29th day of July, 2008.

Ronnie Burks, Chief
ARKANSAS HIGHWAY POLICE

ACKNOWLEDGMENT OF RECYCLING NOTIFICATION

Generator Name: CES ENVIRONMENTAL SERVICES, INC.
Date of Notification: 07/01/2002
Solid Waste Registration Number: 30900
Texas Waste Code: RECEIVER

The TNRCC acknowledges the receipt of your notification pursuant to the requirements of Title 30 TAC § 335.6. Please note that this is not an approval of your recycling activities. The requirements for industrial and/or hazardous wastes which are recycled are found at Title 30 TAC § 335.24. As a reminder, your facility is responsible for insuring that:

1) The subject wastes are managed in accordance with Title 30 TAC § 335.4 (general prohibitions) and Chapter 26.121 of the Texas Water Code; and

2) Should any changes occur or additional information become available concerning: the composition of the waste, the process by which the waste is generated or managed, or any other information referenced in 30 TAC § 335.6, this information is to be provided immediately to the TNRCC.

Your notification has been forwarded to the Industrial and Hazardous Waste Section of Record Services.

ACKNOWLEDGMENT OF RCRA SUBTITLE C SITE IDENTIFICATION FORM

This is to acknowledge that you have filed a RCRA Subtitle C Site Identification Form for the facility located at the address shown in the box below to comply with Section 3010 of the Resource Conservation and Recovery Act (RCRA). Your EPA Identification Number for that facility appears in the box below. The EPA Identification Number must be included on all shipping manifests for transporting hazardous wastes; on all Annual Reports that generators of hazardous waste, and owners and operators of hazardous waste treatment, storage, and disposal facilities must file with EPA; on all applications for a Federal Hazardous Waste Permit; and on other hazardous waste management reports and documents required under Subtitle C of RCRA. A Subsequent RCRA Subtitle C Site Identification Form is required should any information on the original document change.

Mr. Sean Easton, Vice President
CES Environmental Services, Inc.
4904 Griggs Road
Houston, TX 77021

Re: Removal of Hazardous Heels From Tanker Trailer/Waste Containers
Solid Waste Registration Number **30900**
Technical Analysis File Number **2914**

Dear Mr. Easton:

The Technical Analysis Team of the Texas Commission on Environmental Quality (TCEQ) has received your letter of March 7, 2003 regarding the requirements that must be met in order for CES Environmental Services, Inc. (hereafter referred to as CES) to properly remove hazardous heels from tanker trailers or waste containers that are *not* "RCRA empty". On behalf of the TCEQ, I wish to thank you for the opportunity to respond to your letter.

In your letter, you state that, based on the TCEQ interoffice memorandum dated August 5, 1998 entitled, "Management of Residues from Containers", it is CES' understanding that it may remove the hazardous waste heels from tanker trailers or containers that are not "RCRA empty" provided that the following conditions are met:

1. CES is registered with the TCEQ as a transporter of hazardous waste;

2. CES is registered with the TCEQ as a transfer facility and is in compliance with 30 Texas Administrative Code (TAC) Section 335.94 and 30 TAC Section 335.65;

3. Before any heel removal can be started, CES must receive the trailer or other waste container accompanied by a new manifest that is filled out in accordance with the instructions listed in Part C of the aforementioned memorandum;

4. CES must use only dry methods of removal (e.g., scrapping, digging, gravity draining etc.) that do *not* alter the physical or chemical properties of the waste; and

5. Once the hazardous heels have been removed, CES must properly label, store and transport the resulting waste to a permitted TSD facility for final disposal as well as make the referenced changes to the manifest.

Re: Removal of Hazardous Heels From Tanker Trailer/Waste Containers
Solid Waste Registration Number **30900**
Technical Analysis File Number **2914**

Provided that the information in your letter is accurate and complete and: (1) CES complies with what, if any, permit requirements to which it may be subject, (2) CES complies with the requirements of 30 TAC Section 335.4 and Section 26.121 of the Texas Water Code and (3) CES complies with what, if any notification requirements found in 30 TAC Section 335.6 that may apply to CES and which are not covered above, the conditions listed above are sufficient for CES to comply with TCEQ regulations in order to remove hazardous waste heels from tanker trailers or waste containers that are not RCRA empty.

If you have any questions regarding this matter, please contact Mr. Jesse Boultinghouse of my team at (512) 239-2334. If responding by letter, please use Mail Code (MC-130) in the address.

Sincerely,

M. Scott Green

3901 Trailmobile Drive
Houston, Texas 77013

Dear Mr. Stricker:

Under Section 107.503 of Title 49, Code of Federal Regulations (49 CFR), and based upon your letter requesting registration, CES Environmental Services Inc. located at 3901 Trailmobile Drive, Houston, Texas is assigned registration identification number CT-2293.

This registration identification number is issued with the understanding that your use of the registration number as provided in the regulations is considered a certification of compliance of all work performed. The issuance of this registration number is not an approval or endorsement by the Department of Transportation of qualifications or processes you have documented. In addition, a copy of your application, all supporting documentation and a copy of this registration must be retained and made available to DOT upon request.

Each registration must be renewed in accordance with Section 107.504 by submitting an up-to-date registration statement containing the information prescribed by Section 107.503. All submittals must reference the registration number noted above.

Sincerely,

Dear Motor Carrier:

This letter is to notify you of your USDOT identification number and to draw your attention to the requirement for Marking of Commercial Motor Vehicles in section 390.21 of the Federal Motor Carrier Safety Regulations. A copy of this regulation is enclosed. Its primary purpose is to assist enforcement personnel in properly identifying motor carriers, thereby assuring the submission of accurate data to the U. S. Department of Transportation, Federal Motor Carrier Safety Administration. The number also affords the public a way to quickly and accurately identify a motor carrier operating a particular commercial motor vehicle.

If you are operating as a private motor carrier of property or passengers in interstate commerce, as a for-hire motor carrier of property in interstate commerce not subject to regulation by the former Interstate Commerce Commission, or as an interstate motor carrier of migrant workers, this regulation requires you to mark all of your "self-propelled motor vehicles" (generally straight trucks and truck tractors) in accordance with the enclosed.

The following USDOT identification number is assigned to the motor carrier identified above:

USDOT 869392

This letter is being sent to every motor carrier recently added to Federal Motor Carrier Safety Administration records. There has been no attempt to differentiate among private, migrant worker, for-hire, or other types of motor carriers because many carriers conduct operations in a combination of these classifications. If you have questions about compliance with this requirement, please contact the office shown below:

Issued: 05/19/2003 Expires: 12/31/2009

Dear Registrant:

The Texas Commission on Environmental Quality(TCEQ) has received your "Registration for Used Oil Filter Handler" form. Our records indicate that your application is administratively complete and you are currently registered in the State of Texas as the following:

PROCESSOR
STORAGE FACILITY
TRANSPORTER

A copy of this registration must be retained at your designated place of business and if you are registered as a transporter, in each vehicle used to transport the above mentioned.

Your assigned TCEQ Registration Number is A85775. Please contact our office within 30 days, whenever:

* your office mailing address changes;
* your registered facility name changes;
* there is a change in ownership; or
* the operations or management methods are no longer adequately described in your existing registration.

If you should have any questions, please feel free to contact the Used Oil Registration Program at (512) 239-6832 option 2.

Re: **Amendment to Sludge Transportation Registration**
C E S ENVIRONMENTAL SERVICES
Registration Number: 23198 **CN600618946** **RN100693282**

Dear Mr. Thangudu:

The Section Manager of the Registration and Reporting Section has issued the enclosed amended registration in accordance with Title 30 of the Texas Administrative Code (30 TAC) Chapter 312 Subchapter G. This action is taken under authority delegated by the Executive Director of the Texas Commission on Environmental Quality.

Issuance of this registration is not an acknowledgment regarding compliance of your operation with state and federal rules and regulations. Failure to comply with all rules and regulations may result in enforcement action and/or the revocation of your registration.

Please review the enclosed copy of your amended registration. It should replace any previous sludge registrations and reflect your current operation.

A copy of your sludge transporter registration, a copy of your application for registration and copies of all amendments to this registration must be available at all times and at all locations where business is being transacted under this registration, including all motorized vehicles operated under this registration.

If you have any questions or comments, please contact the Sludge Transporter Registration Program at (512) 239-3695.

In reply refer to:
Your USDOT No.: 869392
Review No.: 258575/CR

Dear Motor Carrier:

The motor carrier safety rating for your company is:

SATISFACTORY

This SATISFACTORY rating is the result of a review and evaluation of your safety fitness completed on December 11, 2002. A SATISFACTORY rating indicates that your company has adequate safety management controls in place to meet the safety fitness standard prescribed in 49 C.F.R. 385.5.

Please assure yourself that any specific deficiencies identified in the review report have been corrected. We appreciate your efforts toward promoting motor carrier safety throughout your company. If you have questions or require further information, please contact your local Federal Motor Carrier Safety Administration office listed below:

CERTIFICATE

MC-400234-C

CES ENVIRONMENTAL SERVICES INC

HOUSTON, TX

This Certificate is evidence of the carrier's authority to engage in transportation as a **common carrier of property (except household goods)** by motor vehicle in interstate or foreign commerce.

This authority will be effective as long as the carrier maintains compliance with the requirements pertaining to insurance coverage for the protection of the public (49 CFR 387) and the designation of agents upon whom process may be served (49 CFR 366). The carrier shall also render reasonably continuous and adequate service to the public. Failure to maintain compliance will constitute sufficient grounds for revocation of this authority.

Terry Shelton

Terry Shelton, Director
Office of Data Analysis & Information Systems

NOTE: Willful and persistent noncompliance with applicable safety fitness regulations as evidenced by a DOT safety fitness rating of "Unsatisfactory" or by other indicators, could result in a proceeding requiring the holder of this certificate or permit to show cause why this authority should not be suspended or revoked.

COMBUSTIBLE WASTE STORAGE PERMIT

This permit applies only to property located within the jurisdiction of the City of Houston, Texas.

This permit is restricted to the property listed above and must be clearly posted at that location.

This permit applies only to the type of activity noted above; other permits may be required for other activities.

Be it understood that if the person (listed above) who obtained this permit ceases to have control over the indicated property, this permit shall become invalid. A new permit will be required that shows the person who has control over the property.

This permit was issued and is valid between the dates shown below unless revoked for violation of the terms or conditions under which approval was made.

The issuance of this permit does not constitute approval by the City of Houston for the violation of any deed restriction, or any city, state, and federal laws, regulations or ordinances. Each holder and/or person acting under the authority of this permit is personally responsible for complying with deed restrictions and city, state, and federal laws relating to the activity contemplated by this permit.

Inception Date: 20-JAN-2005

No. of Storage Units on Site: (Two)

Expiration Date: 20-JAN-2011

RE: Application for an Oil And Gas Waste Hauler's Permit
Application Control No. 3998

This letter is to advise you that the referenced application is complete. The application contains information addressing each application requirement and all information necessary to initiate the final review.

The application has been assigned a control number as referenced above.

cc: RRC - HOUSTON / 03

OIL AND GAS WASTE HAULER'S PERMIT

(To be completed by the Commission)

Permit No. 3998 is hereby issued to CES ENVIRONMENTAL SERVICES, INC. subject to the conditions below.

PERMIT CONDITIONS

A. This permit authority is limited to the hauling, handling, and disposal of oil and gas waste off a lease, unit, or other oil and gas property.

B. This permit authorizes the permitted hauler to dispose of oil and gas waste only at the following disposal/injection systems:

- Commission-permitted disposal/injection systems for which a Form WH-3 has been submitted and which are listed on Permit Attachment B, Approved Disposal/Injection Systems;
- disposal systems operated under authority of a minor permit issued by the Commission; and
- disposal systems permitted by another state agency or another state provided the Commission has granted separate authorization for the disposal.

C. Each vehicle must be marked on both sides and in the rear with the permitted hauler's name (exactly as shown on the P-5 organization report) and permit number in characters not less than three inches high.

D. This permit authorizes the permitted hauler to use only those vehicles shown on the Commission-issued listing of approved vehicles (Permit Attachment A, Waste Hauler Vehicle Identification).

E. Each vehicles must carry a copy of this permit along with a copy of those parts of Permit Attachment A (Waste Hauler Vehicles Identification) and Permit Attachment B (Approved Disposal/Injection Systems) that are relevant to that vehicle's activities.

F. Each vehicles must be operated and maintained in such a manner as to prevent spillage, leakage, or other escape of oil and gas waste during transportation.

G. The permitted hauler must make each vehicle available for inspection upon request by Commission personnel.

H. The permitted hauler must compile and keep current a list of all persons by whom the permitted hauler is hired to haul and dispose of oil and gas waste and furnish such list to the Commission upon request.

I. The permitted hauler must adequately train all drivers to ensure compliance with Commission rules, including recordkeeping requirements, and adherence to proper emergency response and notification procedures.

J. The permitted hauler must keep a DAILY record of the oil and gas waste hauling operations of each approved vehicle. The daily record, signed and dated by the vehicle driver, must be kept open for Commission inspection and must contain the following information:

1. Identity of the property from which the oil and gas waste is hauled (operator name, lease name and number or other facility name or number, and county);
2. Type and volume of oil and gas waste received by the hauler at the property where it was generated;
3. Identity of the disposal system to which the oil and gas waste is delivered (operator name, lease name and number or system name, well number or system permit number, and county); and
4. Type and volume of oil and gas waste transported and delivered to the disposal system.

K. This permit is not transferable without the consent of the Commission.

L. This permit expires on 5/31/2009. This permit, unless suspended or revoked for cause shown, will remain valid until the expiration date.

THEORETICAL CALIBRATION IS NOT INTENDED FOR LEGAL MEASUREMENT OF PRODUCT VOLUMES!

INAGE CALIBRATION CHART

7853

Company Unit No.
Manufacturer Serial No. 39396
Total Capacity Equals 7067 Gallons

P. 60

Measure from tank floor directly below dome opening center

THIS CHART IS CERTIFIED FOR THE ABOVE NAMED TANK ONLY. NO CHANGES OF ANY KIND CAN BE MADE WITHOUT THE WRITTEN CONSENT OF THE COMPANY.

1) ABOVE CAPACITY TABLE APPLIES TO TRAILER NO. 5692, SERIAL NO. 10BFU7215LFOA2014 ONLY.
2) TRAILER CALIBRATED WITH WET LINES.
3) GAUGE POINT: TO TOP LIP OF DOME OPPOSITE HINGE.
4) CAPACITIES DETERMINED IN ACCORDANCE WITH API STANDARD 2555, "LIQUID CALIBRATION", USING WATER AS THE CALIBRATING MEDIUM.

THIS CHART IS CERTIFIED FOR THE ABOVE NAMED TANK ONLY. NO CHANGES OF ANY KIND CAN BE MADE WITHOUT THE WRITTEN CONSENT OF THE COMPANY.

1) ABOVE CAPACITY TABLE APPLIES TO TRAILER NO. 5692, SERIAL NO. 10BFU7215LFOA2014 ONLY.
2) TRAILER CALIBRATED WITH WET LINES.
3) GAUGE POINT: TO TOP LIP OF DOME OPPOSITE HINGE.
4) CAPACITIES DETERMINED IN ACCORDANCE WITH API STANDARD 2555, "LIQUID CALIBRATION", USING WATER AS THE CALIBRATING MEDIUM.

TANK CALIBRATION

202 54

ner SCHNEIDER NATIONAL
R NO. 2-0590

Nom. Capy. 8272. gallons
Legal Cap.: 8000. gallons

Domed Height: 5.0
MAKE : POLAR

is height in inches from bottom to top of liquid.

Outage
Outage is height in inches from top of manhole to liquid surface.

In Domestic and Innage

Fax (281) 431-1655

Driver Information

General Site Rules:

- Shutdown all engines when truck is being loaded. This is also to include the trucks at the docks (except engines that are necessary for pumps) DOT CFR 49 requirements.
- NO SMOKING ALLOWED IN THE PLANT THIS INCLUDES THE CAB OF TRUCKS. The only smoking area is at the gazebo.
- Drivers should stay in the truck or in the break room. **Drivers are not allowed in any other areas of the plant including the loading dock area unless escorted by Champion Technologies Personnel.**
- If you are unloading a bulk truck, you must be outside the cab accompanied by Champion Personnel, unless otherwise instructed.
- No pets are to be walked inside the gated area.
- No dumping trash or ashtrays on the ground.
- NO TRUCKS WITH REFRIGERATION UNIT WILL BE LOADED WITH CHEMICAL.
- A window must be rolled down when driving thru the plant.
- Radio volume must be turned down.
- Please sound your horn and stop your vehicle when coming to an intersection or a blind spot.

PPE Required:

- NO SHORTS or SANDELS ALLOWED.
- Hard Hats, Safety Glasses with Side Shields, Long Sleeve Shirts and Steel toed shoes must be ON PRIOR to entering the North Gate.
- Additional PPE may be required when unloading/loading bulk trucks.

Emergency Procedures:

- If alarm sounds, go to your nearest Shelter in Place Location (warehouse break room or the nearest control room.
- If evacuation is necessary, an announcement will be made over the PA system.

THIS CHART IS CERTIFIED FOR THE ABOVE NAMED TANK ONLY. NO CHANGES OF ANY KIND CAN BE MADE WITHOUT THE WRITTEN CONSENT OF OUR COMPANY.

CERTIFIED TANK CALIBRATION, INC.

NOTE: THIS CAPACITY TABLE APPLIES TO TRAILER NO. 5868, SERIAL NO. 10BFT7214SFOA5343 ONLY.
NOTE: LIQUID CALIBRATION DONE IN ACCORDANCE WITH API STANDARD 2555, "LIQUID CALIBRATION", USING WATER AS THE CALIBRATING MEDIUM.
NOTE: GAUGE POINT: TO TOP LIP OF DOME, OPPOSITE HINGE.
NOTE: TRAILER CALIBRATED WITH WET LINES.

Folder ID :	KMCO (KMCO-Crosby, TX) Oily Water

Original – Shipper Provided Short Form Straight Bill of Lading – Not Negotiable – Domestic

SHIPPED FROM :
KMCO, Inc.
16503 Ramsey Rd.
Crosby , TX 77532
(281) 328-3501

This is to certify that the above-named materials ar
11a) HOU-1494
11b)
11c)
11c)

The property described below, in apparent good order, except as noted (contents and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submitted to Shipper or the "Billed to" party and sent to:

CONSIGNED TO :
CES Environmental Services, Inc.
4904 Griggs Rd.
Houston , TX 77021

CARRIER :
CES Environmental Services, Inc.
4904 Griggs Rd.
Houston , TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. *If this Shipment moves between to ports by a carrier by water, the law requires that the Bill of Lading shall state whether* it is "carrier's or shipper's weight."

Intermodal Certificate: All information required by Federal Highway Administration regulations at 49 CFR 390.5(a) implementing the Intermodal Safe Container Act of 1992 is set forth on the face of this bill of lading. The shipper name herein is the tendering party.

U.S. EPA Form 8700-22

Read all instructions before completing this form.

1. This form has been designed for use on a 12-pitch (elite) typewriter which is also compatible with standard computer printers; a firm point pen may also be used—press down hard.
2. Federal regulations require generators and transporters of hazardous waste and owners or operators of hazardous waste treatment, storage, and disposal facilities to complete this form (EPA Form 8700–22) and, if necessary, the continuation sheet (EPA Form 8700–22A) for both inter- and intrastate transportation of hazardous waste.

Public reporting burden for this collection of information is estimated to average: 30 minutes for generators, 10 minutes for transporters, and 25 minutes for owners or operators of treatment, storage, and disposal facilities. This includes time for reviewing instructions, gathering data, completing, reviewing and transmitting the form. Any correspondence regarding the PRA burden statement for the manifest must be sent to the Director of the Collection Strategies Division in EPA's Office of Information Collection at the following address: U.S. Environmental Protection Agency (2822T), 1200 Pennsylvania Ave., NW., Washington, DC 20460. Do not send the completed form to this address.

I. Instructions for Generators

Item 1. Generator's U.S. EPA Identification Number

Enter the generator's U.S. EPA twelve digit identification number, or the State generator identification number if the generator site does not have an EPA identification number.

Item 2. Page 1 of ___

Enter the total number of pages used to complete this Manifest (*i.e.*, the first page (EPA Form 8700-22) plus the number of Continuation Sheets (EPA Form 8700-22A), if any).

Item 3. Emergency Response Phone Number

Enter a phone number for which emergency response information can be obtained in the event of an incident during transportation. The emergency response phone number must:

1. Be the number of the generator or the number of an agency or organization who is capable of and accepts responsibility for providing detailed information about the shipment;
2. Reach a phone that is monitored 24 hours a day at all times the waste is in transportation (including transportation related storage); and
3. Reach someone who is either knowledgeable of the hazardous waste being shipped and has comprehensive emergency response and spill cleanup/incident mitigation information for the material being shipped or has immediate access to a person who has that knowledge and information about the shipment.

Note: Emergency Response phone number information should only be entered in Item 3 when there is one phone number that applies to all the waste materials described in Item 9b. If a situation (*e.g.*, consolidated shipments) arises where more than one Emergency Response phone number applies to the various wastes listed on the manifest, the phone numbers associated with each specific material should be entered after its description in Item 9b.

Item 4. Manifest Tracking Number

This unique tracking number must be pre-printed on the manifest by the forms printer.

Item 5. Generator's Mailing Address, Phone Number and Site Address

Enter the name of the generator, the mailing address to which the completed manifest signed by the designated facility should be mailed, and the generator's telephone number. Note, the telephone number (including area code) should be the normal business number for the generator, or the number where the generator or his authorized agent may be reached to provide instructions in the event the designated and/or alternate (if any) facility rejects some or all of the shipment. Also enter the physical site address from which the shipment originates only if this address is different than the mailing address.

Item 6. Transporter 1 Company Name, and U.S. EPA ID Number

Enter the company name and U.S. EPA ID number of the first transporter who will transport the waste. Vehicle or driver information may not be entered here.

Item 7. Transporter 2 Company Name and U.S. EPA ID Number

If applicable, enter the company name and U.S. EPA ID number of the second transporter who will transport the waste. Vehicle or driver information may not be entered here.

If more than two transporters are needed, use a Continuation Sheet(s) (EPA Form 8700-22A).

Item 8. Designated Facility Name, Site Address, and U.S. EPA ID Number

Enter the company name and site address of the facility designated to receive the waste listed on this manifest. Also enter the facility's phone number and the U.S. EPA twelve digit identification number of the facility.

Item 9. U.S. DOT Description (Including Proper Shipping Name, Hazard Class or Division, Identification Number, and Packing Group)

Item 9a. If the wastes identified in Item 9b consist of both hazardous and nonhazardous materials, then identify the hazardous materials by entering an "X" in this Item next to the corresponding hazardous material identified in Item 9b.

Item 9b. Enter the U.S. DOT Proper Shipping Name, Hazard Class or Division, Identification Number (UN/NA) and Packing Group for each waste as identified in 49 CFR 172. Include technical name(s) and reportable quantity references, if applicable.

Note: If additional space is needed for waste descriptions, enter these additional descriptions in Item 27 on the Continuation Sheet (EPA Form 8700-22A). Also, if more than one Emergency Response phone number applies to the various wastes described in either Item 9b or Item 27, enter applicable Emergency Response phone numbers immediately following the shipping descriptions for those Items.

Item 10. Containers (Number and Type)

Enter the number of containers for each waste and the appropriate abbreviation from Table I (below) for the type of container.

TABLE I.--TYPES OF CONTAINERS

BA = Burlap, cloth, paper, or plastic bags.	DT = Dump truck.
CF = Fiber or plastic boxes, cartons, cases.	DW = Wooden drums, barrels, kegs.
CM = Metal boxes, cartons, cases (including roll-offs).	HG = Hopper or gondola cars.
CW = Wooden boxes, cartons, cases.	TC = Tank cars.
CY = Cylinders.	TP = Portable tanks.
DF = Fiberboard or plastic drums, barrels, kegs.	TT = Cargo tanks (tank trucks).
DM = Metal drums, barrels, kegs.	

Item 11. Total Quantity

Enter, in designated boxes, the total quantity of waste. Round partial units to the nearest whole unit, and *do not* enter decimals or fractions. To the extent practical, report quantities using appropriate units of measure that will allow you to report quantities with precision. Waste quantities entered should be based on actual measurements or reasonably accurate estimates of actual quantities shipped. Container capacities are not acceptable as estimates.

Item 12. Units of Measure (Weight/Volume)

Enter, in designated boxes, the appropriate abbreviation from Table II (below) for the unit of measure.

TABLE II.--UNITS OF MEASURE

G = Gallons (liquids only).	N = Cubic Meters.
K = Kilograms.	P = Pounds.
L = Liters (liquids only).	T = Tons (2000 Pounds).
M = Metric Tons (1000 kilograms).	Y = Cubic Yards.

Note: Tons, Metric Tons, Cubic Meters, and Cubic Yards should only be reported in connection with very large bulk shipments, such as rail cars, tank trucks, or barges.

Item 13. Waste Codes

Enter up to six federal and state waste codes to describe each waste stream identified in Item 9b. State waste codes that are not redundant with federal codes must be entered here, in addition to the federal waste codes which are most representative of the properties of the waste.

Item 14. Special Handling Instructions and Additional Information

1. Generators may enter any special handling or shipment-specific information necessary for the proper management or tracking of the materials under the generator's or other handler's business processes, such as waste profile numbers, container codes, bar codes, or response guide numbers. Generators also may use this space to enter additional descriptive information about their shipped materials, such as chemical names, constituent percentages, physical state, or specific gravity of wastes identified with volume units in Item 12.
2. This space may be used to record limited types of federally required information for which there is no specific space provided on the manifest, including any alternate facility designations, the manifest tracking number of the original manifest for rejected wastes and residues that are re-shipped under a second manifest; and the specification of PCB waste descriptions and PCB out-of-service dates required under 40 CFR 761.207. Generators, however, cannot be required to enter information in this space to meet state regulatory requirements.

Item 15. Generator's/Offeror's Certification:

1. The generator must read, sign, and date the waste minimization certification statement. In signing the waste minimization certification statement, those generators who have not been exempted by statute or regulation from the duty to make a waste minimization certification under section 3002(b) of RCRA are also certifying that they have complied with the waste minimization requirements. The Generator's Certification also contains the required attestation that the shipment has been properly prepared and is in proper condition for transportation (the shipper's certification). The content of the shipper's certification statement is as follows: "I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name, and are classified, packaged, marked and labeled/placarded, and are in all respects in proper condition for transport according to applicable international and national governmental regulations. If export shipment and I am the Primary Exporter, I certify that the contents of this consignment conform to the terms of the attached EPA Acknowledgment of Consent." When a party other than the generator prepares the shipment for transportation, this party may also sign the shipper's certification statement as the offeror of the shipment.
2. Generator or Offeror personnel may preprint the words, "On behalf of" in the signature block or may hand write this statement in the signature block prior to signing the generator/offeror certification, to indicate that the individual signs as the employee or agent of the named principal.

Note: All of the above information except the handwritten signature required in Item 15 may be pre-printed.

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submitted to Shipper or the "Billed to" party and sent to:

CONSIGNED TO :
CES Environmental Services, Inc.
4904 Griggs Rd.
Houston , TX 77021

CARRIER :
CES Environmental Services, Inc.
4904 Griggs Rd.
Houston , TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Shipment moves between to ports by a carrier by water, the law requires that the Bill of Lading shall state whether it is "carrier's or shipper's weight."

Intermodal Certificate: All information required by Federal Highway Administration regulations at 49 CFR 390.5499 implementing the intermodal Safe Container Act of 1992 is set forth on the face of this bill of lading. The shipper name herein is the tendering party.

MONTHLY SUMMARY SHEET

MONTH: _____

If you operate on the period of 70 hours in 8 days, use the summary sheet on the left; if you operate on the period of 60 hours in 7 days, use the summary sheet on the right.

The figures 1 to 31 represent calendar days, and entries should be made for each day - even when driver does not work. If no work is performed, enter zero (0) in first column and compute other columns as explained below.

70 HR/8 DAY DRIVERS ONLY

Day of mo.	Hours Worked Today (Total of lines 3 & 4 on graph)	A: Total hours on-duty last 7 days – OR – Total hours on-duty since restart	B: Hours available tomorrow. 70 hours minus col. A	C: Total hours on-duty last 8 days – OR – Total hours on-duty since restart

70 HOURS - 8 DAYS

Enter the number of working hours (on duty & driving) for each of the last seven days of the preceding month in the first seven spaces under the column headed "Hours Worked Today". Enter in the first space under Column A the Total of the number of hours worked during the last 7 days. Subtract the figure entered in Column A from 70 hours and enter this figure - hours available for tomorrow - in Column B.

At the end of each day, complete the first three columns adjacent to the days of month in the same manner as explained above. Total the number of hours worked during the last 8 days and enter in Column C. If any number in Column C exceeds 70, no driving should have been done. Any driving that was done is a violation and should be circled for easy identification.

34-hour restart: If you took 34 consecutive hours off duty, you have 70 hours available again. You would then begin your totaling on the day of the restart and not go back the full 7 or 8 days.

60 HR/7 DAY DRIVERS ONLY

Day of mo.	Hours Worked Today (Total of lines 3 & 4 on graph)	A: Total hours on-duty last 6 days – OR – Total hours on-duty since restart	B: Hours available tomorrow. 60 hours minus col. A	C: Total hours on-duty last 7 days – OR – Total hours on-duty since restart

60 HOURS - 7 DAYS

Follow the same instructions provided for completing the summary sheet for 8 days – 70 hours, except substitute last six days for last seven days and 60 hours for 70 hours.

34-hour restart: If you took 34 consecutive hours off duty, you have 60 hours available again. You would then begin your totaling on the day of the restart and not go back the full 6 or 7 days.

MONTHLY SUMMARY SHEET

MONTH: _____

If you operate on the period of 70 hours in 8 days, use the summary sheet on the left; if you operate on the period of 60 hours in 7 days, use the summary sheet on the right.

The figures 1 to 31 represent calendar days, and entries should be made for each day - even when driver does not work. If no work is performed, enter zero (0) in first column and compute other columns as explained below.

70 HR/8 DAY DRIVERS ONLY

Day of mo.	Hours Worked Today (Total of lines 3 & 4 on graph)	A	B	C
Last 7 days of preceding month	9¼	Total hours on-duty last **7** days – OR – Total hours on-duty since restart	Hours available tomorrow. 70 hours minus col. A	Total hours on-duty last **8** days – OR – Total hours on-duty since restart

29	12	43¼	26¾	43¼
30	0	0	0	0
31	0	0	0	0

70 HOURS - 8 DAYS

Enter the number of working hours (on duty & driving) for each of the last seven days of the preceding month in the first seven spaces under the column headed "Hours Worked Today". Enter in the first space under Column A the Total of the number of hours worked during the last 7 days. Subtract the figure entered in Column A from 70 hours and enter this figure - hours available for tomorrow - in Column B.

At the end of each day, complete the first three columns adjacent to the days of month in the same manner as explained above. Total the number of hours worked during the last 8 days and enter in Column C. If any number in Column C exceeds 70, no driving should have been done. Any driving that was done is a violation and should be circled for easy identification.

34-hour restart: If you took 34 consecutive hours off duty, you have 70 hours available again. You would then begin your totaling on the day of the restart and not go back the full 7 or 8 days.

60 HR/7 DAY DRIVERS ONLY

Day of mo.	Hours Worked Today (Total of lines 3 & 4 on graph)	A	B	C
Last 6 days of preceding month		Total hours on-duty last **6** days – OR – Total hours on-duty since restart	Hours available tomorrow. 60 hours minus col. A	Total hours on-duty last **7** days – OR – Total hours on-duty since restart

31				

60 HOURS - 7 DAYS

Follow the same instructions provided for completing the summary sheet for 8 days – 70 hours, except substitute last six days for last seven days and 60 hours for 70 hours.

34-hour restart: If you took 34 consecutive hours off duty, you have 60 hours available again. You would then begin your totaling on the day of the restart and not go back the full 6 or 7 days.

MONTHLY SUMMARY SHEET

MONTH: _____

If you operate on the period of 70 hours in 8 days, use the summary sheet on the left; if you operate on the period of 60 hours in 7 days, use the summary sheet on the right.

The figures 1 to 31 represent calendar days, and entries should be made for each day - even when driver does not work. If no work is performed, enter zero (0) in first column and compute other columns as explained below.

70 HR/8 DAY DRIVERS ONLY

Day of mo.	Hours Worked Today (Total of lines 3 & 4 on graph)	A	B	C
		Total hours on-duty last 7 days – OR – Total hours on-duty since restart	Hours available tomorrow. 70 hours minus col. A	Total hours on-duty last 8 days – OR – Total hours on-duty since restart

30	11¾	47¼	22¾	47¼
31				

70 HOURS - 8 DAYS

Enter the number of working hours (on duty & driving) for each of the last seven days of the preceding month in the first seven spaces under the column headed "Hours Worked Today". Enter in the first space under Column A the Total of the number of hours worked during the last 7 days. Subtract the figure entered in Column A from 70 hours and enter this figure - hours available for tomorrow - in Column B.

At the end of each day, complete the first three columns adjacent to the days of month in the same manner as explained above. Total the number of hours worked during the last 8 days and enter in Column C. If any number in Column C exceeds 70, no driving should have been done. Any driving that was done is a violation and should be circled for easy identification.

34-hour restart: If you took 34 consecutive hours off duty, you have 70 hours available again. You would then begin your totaling on the day of the restart and not go back the full 7 or 8 days.

60 HR/7 DAY DRIVERS ONLY

Day of mo.	Hours Worked Today (Total of lines 3 & 4 on graph)	A	B	C
		Total hours on-duty last 6 days – OR – Total hours on-duty since restart	Hours available tomorrow. 60 hours minus col. A	Total hours on-duty last 7 days – OR – Total hours on-duty since restart

60 HOURS - 7 DAYS

Follow the same instructions provided for completing the summary sheet for 8 days – 70 hours, except substitute last six days for last seven days and 60 hours for 70 hours.

34-hour restart: If you took 34 consecutive hours off duty, you have 60 hours available again. You would then begin your totaling on the day of the restart and not go back the full 6 or 7 days.

MONTHLY SUMMARY SHEET

MONTH: _____

If you operate on the period of 70 hours in 8 days, use the summary sheet on the left; if you operate on the period of 60 hours in 7 days, use the summary sheet on the right.

The figures 1 to 31 represent calendar days, and entries should be made for each day - even when driver does not work. If no work is performed, enter zero (0) in first column and compute other columns as explained below.

70 HR/8 DAY DRIVERS ONLY

Day of mo.	Hours Worked Today (Total of lines 3 & 4 on graph)	A: Total hours on-duty last 7 days – OR – Total hours on-duty since restart	B: Hours available tomorrow. 70 hours minus col. A	C: Total hours on-duty last 8 days – OR – Total hours on-duty since restart

30	12¼	20	50	20
31				

70 HOURS - 8 DAYS

Enter the number of working hours (on duty & driving) for each of the last seven days of the preceding month in the first seven spaces under the column headed "Hours Worked Today". Enter in the first space under Column A the Total of the number of hours worked during the last 7 days. Subtract the figure entered in Column A from 70 hours and enter this figure - hours available for tomorrow - in Column B.

At the end of each day, complete the first three columns adjacent to the days of month in the same manner as explained above. Total the number of hours worked during the last 8 days and enter in Column C. If any number in Column C exceeds 70, no driving should have been done. Any driving that was done is a violation and should be circled for easy identification.

34-hour restart: If you took 34 consecutive hours off duty, you have 70 hours available again. You would then begin your totaling on the day of the restart and not go back the full 7 or 8 days.

60 HR/7 DAY DRIVERS ONLY

Day of mo.	Hours Worked Today (Total of lines 3 & 4 on graph)	A: Total hours on-duty last 6 days – OR – Total hours on-duty since restart	B: Hours available tomorrow. 60 hours minus col. A	C: Total hours on-duty last 7 days – OR – Total hours on-duty since restart

31				

60 HOURS - 7 DAYS

Follow the same instructions provided for completing the summary sheet for 8 days – 70 hours, except substitute last six days for last seven days and 60 hours for 70 hours.

34-hour restart: If you took 34 consecutive hours off duty, you have 60 hours available again. You would then begin your totaling on the day of the restart and not go back the full 6 or 7 days.

MONTHLY SUMMARY SHEET

MONTH: _____

If you operate on the period of 70 hours in 8 days, use the summary sheet on the left; if you operate on the period of 60 hours in 7 days, use the summary sheet on the right.

The figures 1 to 31 represent calendar days, and entries should be made for each day - even when driver does not work. If no work is performed, enter zero (0) in first column and compute other columns as explained below.

70 HR/8 DAY DRIVERS ONLY

Day of mo.	Hours Worked Today (Total of lines 3 & 4 on graph)	A: Total hours on-duty last 7 days – OR – Total hours on-duty since restart	B: Hours available tomorrow. 70 hours minus col. A	C: Total hours on-duty last 8 days – OR – Total hours on-duty since restart

8

70 HOURS - 8 DAYS

Enter the number of working hours (on duty & driving) for each of the last seven days of the preceding month in the first seven spaces under the column headed "Hours Worked Today". Enter in the first space under Column A the Total of the number of hours worked during the last 7 days. Subtract the figure entered in Column A from 70 hours and enter this figure - hours available for tomorrow - in Column B.

At the end of each day, complete the first three columns adjacent to the days of month in the same manner as explained above. Total the number of hours worked during the last 8 days and enter in Column C. If any number in Column C exceeds 70, no driving should have been done. Any driving that was done is a violation and should be circled for easy identification.

34-hour restart: If you took 34 consecutive hours off duty, you have 70 hours available again. You would then begin your totaling on the day of the restart and not go back the full 7 or 8 days.

60 HR/7 DAY DRIVERS ONLY

Day of mo.	Hours Worked Today (Total of lines 3 & 4 on graph)	A: Total hours on-duty last 6 days – OR – Total hours on-duty since restart	B: Hours available tomorrow. 60 hours minus col. A	C: Total hours on-duty last 7 days – OR – Total hours on-duty since restart

60 HOURS - 7 DAYS

Follow the same instructions provided for completing the summary sheet for 8 days – 70 hours, except substitute last six days for last seven days and 60 hours for 70 hours.

34-hour restart: If you took 34 consecutive hours off duty, you have 60 hours available again. You would then begin your totaling on the day of the restart and not go back the full 6 or 7 days.

MONTHLY SUMMARY SHEET

MONTH: _____

If you operate on the period of 70 hours in 8 days, use the summary sheet on the left; if you operate on the period of 60 hours in 7 days, use the summary sheet on the right.

The figures 1 to 31 represent calendar days, and entries should be made for each day - even when driver does not work. If no work is performed, enter zero (0) in first column and compute other columns as explained below.

70 HR/8 DAY DRIVERS ONLY

Day of mo.	Hours Worked Today (Total of lines 3 & 4 on graph)	A	B	C
Last 7 days of preceding month	0	Total hours on-duty last 7 days – OR – Total hours on-duty since restart	Hours available tomorrow. 70 hours minus col. A	Total hours on-duty last 8 days – OR – Total hours on-duty since restart

70 HOURS - 8 DAYS

Enter the number of working hours (on duty & driving) for each of the last seven days of the preceding month in the first seven spaces under the column headed "Hours Worked Today". Enter in the first space under Column A the Total of the number of hours worked during the last 7 days. Subtract the figure entered in Column A from 70 hours and enter this figure - hours available for tomorrow - in Column B.

At the end of each day, complete the first three columns adjacent to the days of month in the same manner as explained above. Total the number of hours worked during the last 8 days and enter in Column C. If any number in Column C exceeds 70, no driving should have been done. Any driving that was done is a violation and should be circled for easy identification.

34-hour restart: If you took 34 consecutive hours off duty, you have 70 hours available again. You would then begin your totaling on the day of the restart and not go back the full 7 or 8 days.

60 HR/7 DAY DRIVERS ONLY

Day of mo.	Hours Worked Today (Total of lines 3 & 4 on graph)	A	B	C
Last 6 days of preceding month		Total hours on-duty last 6 days – OR – Total hours on-duty since restart	Hours available tomorrow. 60 hours minus col. A	Total hours on-duty last 7 days – OR – Total hours on-duty since restart

60 HOURS - 7 DAYS

Follow the same instructions provided for completing the summary sheet for 8 days – 70 hours, except substitute last six days for last seven days and 60 hours for 70 hours.

34-hour restart: If you took 34 consecutive hours off duty, you have 60 hours available again. You would then begin your totaling on the day of the restart and not go back the full 6 or 7 days.

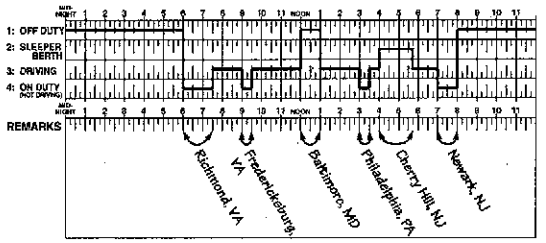
Sample Completed Grid

The following grid illustrates how a driver's duty status should be recorded for a trip from Richmond, Virginia, to Newark, New Jersey. The grid reflects the midnight-to-midnight 24-hour period.



Graph Grid (midnight to midnight operation)

The driver in this instance reported for duty at the motor carrier's terminal. The driver reported for work at 6 a.m., helped load, checked with dispatch, made a pretrip inspection, and performed other duties until 7:30 a.m. when the driver began driving. At 9 a.m. the driver had a minor accident in Fredericksburg, Virginia, and spent one half hour handling details with the local police. The driver arrived at the company's Baltimore, Maryland, terminal at noon and went to lunch while minor repairs were made to the tractor. At 1 p.m. the driver resumed the trip and made a delivery in Philadelphia, Pennsylvania, between 3 p.m. and 3:30 p.m. at which time the driver started driving again. Upon arrival at Cherry Hill, New Jersey, at 4 p.m., the driver entered the sleeper berth for a rest break until 5:45 p.m. at which time the driver resumed driving again. At 7 p.m. the driver arrived at the company's terminal in Newark, New Jersey. Between 7 p.m. and 8 p.m. the driver prepared the required paperwork including completing the driver's record of duty status, driver vehicle inspection report, insurance report for the Fredericksburg, Virginia accident, checked for the next day's dispatch, etc. At 8 p.m., the driver went off duty.

EZ Explanations®

Main Points of 2005 Hours of Service Regulations (Property-Carrying Vehicles)

© J. J. Keller & Associates, Inc.

- **Off-duty time:** 10 consecutive hours.
- **On-duty time:** 14 consecutive hours after coming on duty.
- **Driving time:** 11 hours.
- **Weekly limits:** 60 hours/7 days or 70 hours/8 days (no change).
- **34-hour restart:** The 60/70-hour clock may restart after 34 consecutive hours off duty.
- **Split sleeper berth:** One period of at least 8 (but less than 10) consecutive hours in the sleeper berth; and a separate period, before or after the 8-hour period, of at least 2 (but less than 10) consecutive hours. The 2-consecutive-hour period may be in the sleeper berth, off duty, or any combination of the two. The 8-hour period will not be counted as part of the 14 hours, but the 2-hour period will be counted as part of the 14 hours. Following the second period, hours available under the 11-hour and 14-hour rules must be re-calculated from the end of the first of the two periods.
- **Short-haul 16-hour exception:** The 14-hour on-duty period can be extended to 16 hours if driver has been released from duty at the normal work reporting location for the previous 5 duty tours, is released from duty at the normal work reporting location within 16 hours, and has not used exception in the previous 6 days (except following a 34-hour restart of a 7/8-day period).
- **Compliance Date:** October 1, 2005

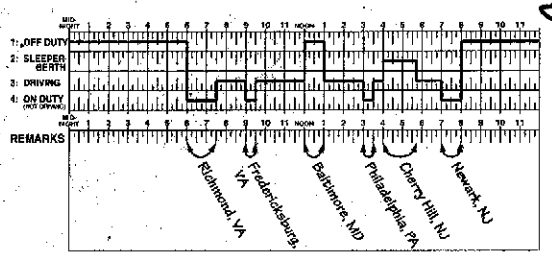
Sample Completed Grid

The following grid illustrates how a driver's duty status should be recorded for a trip from Richmond, Virginia, to Newark, New Jersey. The grid reflects the midnight-to-midnight 24-hour period.



Graph Grid (midnight to midnight operation)

The driver in this instance reported for duty at the motor carrier's terminal. The driver reported for work at 6 a.m., helped load, checked with dispatch, made a pretrip inspection, and performed other duties until 7:30 a.m. when the driver began driving. At 9 a.m. the driver had a minor accident in Fredericksburg, Virginia, and spent one half hour handling details with the local police. The driver arrived at the company's Baltimore, Maryland, terminal at noon and went to lunch while minor repairs were made to the tractor. At 1 p.m. the driver resumed the trip and made a delivery in Philadelphia, Pennsylvania, between 3 p.m. and 3:30 p.m. at which time the driver started driving again. Upon arrival at Cherry Hill, New Jersey, at 4 p.m., the driver entered the sleeper berth for a rest break until 5:45 p.m. at which time the driver resumed driving again. At 7 p.m. the driver arrived at the company's terminal in Newark, New Jersey. Between 7 p.m. and 8 p.m. the driver prepared the required paperwork including completing the driver's record of duty status, driver vehicle inspection report, insurance report for the Fredericksburg, Virginia accident, checked for the next day's dispatch, etc. At 8 p.m., the driver went off duty.

eZ Explanations®

Main Points of 2005 Hours of Service Regulations (Property-Carrying Vehicles)

© J. J. Keller & Associates, Inc.

- **Off-duty time:** 10 consecutive hours.
- **On-duty time:** 14 consecutive hours after coming on duty.
- **Driving time:** 11 hours.
- **Weekly limits:** 60 hours/7 days or 70 hours/8 days (no change).
- **34-hour restart:** The 60/70-hour clock may restart after 34 consecutive hours off duty.
- **Split sleeper berth:** One period of at least 8 (but less than 10) consecutive hours in the sleeper berth; and a separate period, before or after the 8-hour period, of at least 2 (but less than 10) consecutive hours. The 2-consecutive-hour period may be in the sleeper berth, off duty, or any combination of the two. The 8-hour period will not be counted as part of the 14 hours, but the 2-hour period will be counted as part of the 14 hours. Following the second period, hours available under the 11-hour and 14-hour rules must be re-calculated from the end of the first of the two periods.
- **Short-haul 16-hour exception:** The 14-hour on-duty period can be extended to 16 hours if driver has been released from duty at the normal work reporting location for the previous 5 duty tours, is released from duty at the normal work reporting location within 16 hours, and has not used exception in the previous 6 days (except following a 34-hour restart of a 7/8-day period).
- **Compliance Date:** October 1, 2005

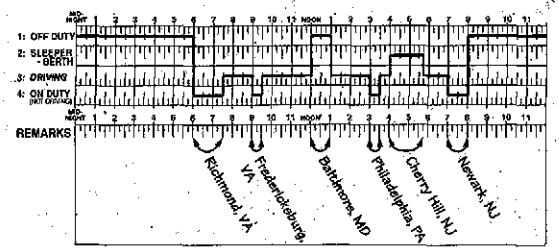
Sample Completed Grid

The following grid illustrates how a driver's duty status should be recorded for a trip from Richmond, Virginia, to Newark, New Jersey. The grid reflects the midnight-to-midnight 24-hour period.



Graph Grid (midnight to midnight operation)

The driver in this instance reported for duty at the motor carrier's terminal. The driver reported for work at 6 a.m., helped load, checked with dispatch, made a pretrip inspection, and performed other duties until 7:30 a.m. when the driver began driving. At 9 a.m. the driver had a minor accident in Fredericksburg, Virginia, and spent one half hour handling details with the local police. The driver arrived at the company's Baltimore, Maryland, terminal at noon and went to lunch while minor repairs were made to the tractor. At 1 p.m. the driver resumed the trip and made a delivery in Philadelphia, Pennsylvania, between 3 p.m. and 3:30 p.m. at which time the driver started driving again. Upon arrival at Cherry Hill, New Jersey, at 4 p.m., the driver entered the sleeper berth for a rest break until 5:45 p.m. at which time the driver resumed driving again. At 7 p.m. the driver arrived at the company's terminal in Newark, New Jersey. Between 7 p.m. and 8 p.m. the driver prepared the required paperwork including completing the driver's record of duty status, driver vehicle inspection report, insurance report for the Fredericksburg, Virginia accident, checked for the next day's dispatch, etc. At 8 p.m., the driver went off duty.

EZ Explanations®

Main Points of 2005 Hours of Service Regulations (Property-Carrying Vehicles)

© J. J. Keller & Associates, Inc.

- **Off-duty time:** 10 consecutive hours.
- **On-duty time:** 14 consecutive hours after coming on duty.
- **Driving time:** 11 hours.
- **Weekly limits:** 60 hours/7 days or 70 hours/8 days (no change).
- **34-hour restart:** The 60/70-hour clock may restart after 34 consecutive hours off duty.
- **Split sleeper berth:** One period of at least 8 (but less than 10) consecutive hours in the sleeper berth; and a separate period, before or after the 8-hour period, of at least 2 (but less than 10) consecutive hours. The 2-consecutive-hour period may be in the sleeper berth, off duty, or any combination of the two. The 8-hour period will not be counted as part of the 14 hours, but the 2-hour period will be counted as part of the 14 hours. Following the second period, hours available under the 11-hour and 14-hour rules must be re-calculated from the end of the first of the two periods.
- **Short-haul 16-hour exception:** The 14-hour on-duty period can be extended to 16 hours if driver has been released from duty at the normal work reporting location for the previous 5 duty tours, is released from duty at the normal work reporting location within 16 hours, and has not used exception in the previous 6 days (except following a 34-hour restart of a 7/8-day period).
- **Compliance Date:** October 1, 2005

Bill Of Lading # : 69294

87

Folder ID :	Buckeye Gulf Coast Pipeline (Buckeye Pipeline- Liberty, Tx) Valve #14 and #15 Replacement Ammonia

Original – Shipper Provided Short Form Straight Bill of Lading – Not Negotiable – Domestic

SHIPPED FROM :

Buckeye Gulf Coast Pipe Lines 11a)
1958 Hwy 288B 11b)
Richwood , TX 77566 11c)
(979) 380-0580 11c)

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submitted to Shipper or the "Billed to" party and sent to.

CONSIGNED TO :

Graham Ranch
275 Ridgeway Lane
Beeville , TX 78102

CARRIER :

CES Environmental Services, Inc.
4904 Griggs Rd.
Houston , TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Shipment moves between to ports by a carrier by water, the law requires that the Bill of Lading shall state whether it is "carrier's or shipper's weight."

Intermodal Certificate: All information required by Federal Highway Administration regulations at 49 CFR 390.5449 implementing the Intermodal Safe Container Act of 1992 is set forth on the face of this bill of lading. The shipper name herein is the tendering party.

Truck Driver Orientation

KMCO Rules
(Failure to abide by these may result in immediate expulsion/banishment from KMCO facility)

1. Sign in on KMCO, Inc. Log
2. Wear hard hat, eye protection and long pants. (No shorts allowed in plant)
3. Stay with your vehicle
4. Stop engine
5. Set hand brake
6. No smoking allowed – KMCO is a smoke free workplace
7. No cell phones allowed in plant
8. Do NOT assist plant technicians in hooking/unhooking trailers
9. Follow the plant speed limit – 5 MPH
10. Notify KMCO personnel of any problem

Highly hazardous chemicals are used in the KMCO facility. Some of these chemicals are possible carcinogens and reproductive hazards. You have the right to request a Material Safety Data Sheet from KMCO personnel for any chemical handled in the facility.

In the unlikely even of a plant-wide emergency, follow instructions from KMCO personnel.

By signing this document you are acknowledging that you have read and understand the requirements and consequences for being on the KMCO site.

Common Name: Anhydrous Ammonia **Formula:** NH_3 **Synonym:** Ammonia **Use:** Industrial, Agricultural

Section II - Composition/Information On Ingredients

CHEMICAL NAME(s)	CAS No.	Exposure Limits								% by Weight
		OSHA PEL		TLV - TWA		STEL		CEIL		
		mg/m³	ppm	mg/m³	ppm	mg/m³	ppm	mg/m³	ppm	
Ammonia	7664-41-7		50		25		35			99.5-100

Section III - Hazard Identification

Potential Acute Health Effects: Lung irritation and pulmonary edema after 12 – 24 hours delay. If contact with gas prolonged more than a few minutes, severe burning pain and corrosive damage.

Eyes and Skin: **Eyes:** Contact with liquid will cause tissue damage. Contact with gas at 70 ppm causes irritation to the eyes, nose, and throat. Skin: If contact with gas prolonged more than a few minutes, severe burning pain and corrosive damage. Contact with liquid will cause severe tissue damage

Inhalation: Highly irritating to throat at approximately 400 ppm. Causes edema, dyspnoea, bronchospasm, chest pain, pink frothy sputum. Airborne exposures of approximately 70 ppm will irritate the eyes, nose, and throat.

Ingestion: Symptoms similar to inhalation. Lung irritation and pulmonary edema after 12 – 24 hours delay.

Potential Chronic Health Effects: Contact with liquid will cause severe tissue damage

Carcinogenicity Lists: **IARC Monograph:** No **NTP:** No **OSHA :** No
No carcinogenic effects

Section IV - First Aid Measures

Eyes: Flood with water immediately for at least 15 minutes. Remove patient to uncontaminated area. In case of severe exposure, call physician promptly. Keep patient warm.

Skin: Flood with water immediately for at least 15 minutes. Remove patient to uncontaminated area. In case of severe exposure, call physician promptly. Keep patient warm.

Ingestion: Give large quantities of water, but do not induce vomiting. Call a physician promptly. Give neutralizing agents, such as citrus fruit juices or diluted vinegar.

Inhalation: Remove patient to an uncontaminated area. Prompt artificial respiration with 100% oxygen may be required.

Section V - Fire Fighting Measures

Flash Point: Not Applicable **Autoignition Temperature:** 651°C / 1204°F at 1 atm
Lower Explosive Limit: 16% **Upper Explosive Limit:** 25%

Unusual Fire and Explosion Hazards: Presence of oil or other combustible materials will increase the fire hazard. See Hazardous Decomposition Products, Section X.

Extinguishing Media: Stop flow of gas before extinguishing fire. All standard agents are acceptable. (Water, carbon dioxide (CO_2), dry chemical, foam) Note: Ammonia has a strong attraction to water. Large quantities of heat may be generated.

Special Firefighting Procedures and Equipment: Stop flow of gas before extinguishing fire. Use water spray to keep fire-exposed containers cool and to protect persons effecting the shut-off.Wear full protective clothing and self-contained breathing apparatus approved by NIOSH. Ammonia may be an explosion hazard in a confined space.

Section VI - Accidental Release Measures

Small Spill:	Restrict access to the area until completion of cleanup. For liquid spill, evacuate downwind from the area. For gas leak, evacuate. Remain upwind of spill or leak. Eliminate ignition sources and provide ventilation. Emergency workers should use full protective clothing and positive pressure self-contained breathing apparatus and may be sent back to dike spill & minimize evaporation or close off valve, etc Use cold water to absorb ammonia vapor from air. Thoroughly wash down area with water. Do not directly discharge this ammonia/water solution to municipal sewers, confined drains, or surface waters. In unknown concentrations SCBA must be worn. Keep ignition sources away.
Large Spill:	Remain upwind of spill or leak. For liquid spill, evacuate area. A person with complete protection may be sent back to dike spill & minimize evaporation. For gas leak, evacuate. A person with appropriate protective equipment may be sent to close off valve, etc. In unknown concentrations SCBA must be worn. Keep ignition sources away.
Release Notes:	If spill could potentially enter any waterway, including intermittent dry creeks, contact the local authorities. If in the U.S., contact the US COAST GUARD NATIONAL RESPONSE CENTER toll free number 800-424-8802. In case of accident or road spill notify: CHEMTREC IN USA at 800-424-9300; CANUTEC in Canada at 613-996-6666 CHEMTREC in other countries at (International code)+1-703-527-3887.
Comments:	See Section XIII for disposal information and Section XV for regulatory requirements. Large and small spills may have a broad definition depending on the user's handling system. Therefore, the spill category must be defined at the point of release by technically qualified personnel.

Section VII - Handling and Storage

Ventilation:	Natural ventilation should be provided. Use mechanical (general) ventilation if natural ventilation is found inadequate.
Handling:	Avoid heating containers. Use proper level of personal equipment as defined in SectionVII. Also see OSHA 29 CFR 1910.111. Never trap ammonia between closed valves.
Storage:	Preferably stored outside. Otherwise in cool, well-ventilated, non-combustible location, away from all possible sources of ignition and contamination. Also see OSHA 29 CFR 1910.111. Protect containers from excessive heat (Greater than 120 degree F). Use only approved pressure vessels with appropriate safety devices. Never fill pressure storage tanks over 85% of vessel volume. Do not contact liquid ammonia pools, or leaks from containers, with direct streams of water. Use iron or steel tanks and piping, and valves especially designed for ammonia service.

Section VIII - Exposure Controls/Personal Protection

Engineering Controls:	Use mechanical (general) ventilation if natural ventilation is found inadequate.
PERSONAL PROTECTION:	
Eye Protection:	Tight fitting unvented goggles and face shield to protect against splashing. Contact lenses should not be worn.
Protective Clothing:	Level "A" Clothing – Full encapsulating suit with self contained breathing apparatus should be utilized for handling large liquid spills or vapor clouds. Use impervious clothing and rubber gloves for small liquid spills and normal loading and unloading operations.
Respiratory Protection:	Use NIOSH approved respirator relating to the exposure concentration. Use a self-contained breathing apparatus in the event Ammonia concentrations cannot be determined. Use a specific cartridge or canister for NH3 gas. Supplied air respirator required for exposure of 300 ppm or greater. All respirators must meet NIOSH standards.
Other Protective Clothing or Equipment:	Safety shower/eye wash facility at sites of handling or storage

Section IX - Physical and Chemical Properties

Appearance/Color/Odor:	This material at normal conditions is a gas with an intensely irritating, penetrating strong pungent odor and is shipped as a liquid under pressure.

Melting Point/Range:	-77.7°C (-109°F)	**Boiling Point:**	-33.35°C (-28°F) at 1 atm
Solubility in Water:	510 - 530 g/L @ 20°C (68°F)	**Boiling Point/Range:**	Not Available
Specific Gravity:	0.682 @ -33.35°C (-28°F) and 1atm	**Vapor Pressure(mmHg):**	7600 mmHg at 25°C (77°F)
Vapor Density:	0.596 @ 0°C (32°F)	**Molecular Weight:**	17.03
Bulk Density:	42.57 Lb / ft3 5.69 lbs/gal	**%Volatiles:**	by Volume (at 20°C) 100%
pH:	11.6 for 1%AQ sol; 11.1 for 0.1AQ sol; 10.6 for .01 AQ sol	**Evaporation Rate:**	Not Available
		Density:	0.696 g/L @ 20°C
Viscosity:	0.00982 cP at 20°C		

Section X - Stability and Reactivity

Stability:	This product is stable under normal ambient conditions of temperature and pressure.
Hazardous Polymerization:	Will not occur
Conditions to Avoid:	High temperatures and ignition sources.
Materials to Avoid (Incompatibilities):	Separate from other chemicals, particularly oxidizing gases, silver oxide, mercury, chlorine, bromine, iodine, and acids. Also avoid: copper, tin, and zinc. Note: hazardous reactions have been documented for contact of anhydrous ammonia with: acetaldehyde, acrolein, boron, boron trioxide, bromine, chlorine, chlorites, chromium trioxide, ethylene oxide, fluoride, gold, hypochlorous acid, iodine, mercury, nitric acid nitrogen, tetroxide, nitrogen trichloride, nitrogen trifluoride, phosphorus trioxide, picric acid, potassium chlorate, potassium ferricyanide, silver, silver chloride. Liquified gases in contact with water can explode violently.
Hazardous Decomposition Products:	Normal combustion of Ammonia in air yields Nitrogen and water (steam). Under certain conditions of temperature and pressure some quantity of Hydrogen and Oxides of Nitrogen may also be formed.

Section XI - Toxicological Information

Significant Routes of Exposure:	Skin or eye contact, lungs (breathing). Ingestion (swallowing) is unlikely.
Toxicity to Animals:	**Acute Oral Toxicity** (not available). **Acute Inhalation Toxicity**: (rat, mouse) LC_{50} = 4,230 - 19,960 mg/m^3. **Acute Dermal Toxicity**:(not available). **Acute Toxicity Other Routes**:(rat, mouse) LC_{50}= 45.5 - 195.1 mg/total NH_3/kg bw. **Repeated Dose Toxicity**: No mortality seen in rats, guinea pigs, rabbits, dogs and monkeys in Inhalation studies at up to 770 mg/m^3. **Acutely toxic by inhalation as defined by OSHA.**
Special Remarks on Toxicity to Animals:	**Bacterial Genetic Toxicity *in-vitro*** : Negative **Non-bacterial Genetic Toxicity *in-vitro*** : Induce chromosomal clumping and polyploidy in chick fibroblasts and arrested spindle formation. No data showing that ammonia is mutagenic in mammals. **Genectic Toxicity *in-vivo*** -(*Drosohila melanogaster*): No evidence for mutagencity. **Toxicity to Reproduction**: Temporarily Depressed Mean Daily Gain: (MDG) at 35 mg/kg in gilts **Skin Irritation/Corrosion:**Corrosive to skin. **Eye Irritation/Corrosion:** Subacute and chronic exposure to 200-1,000 ppm produce eye damage.
Other Effects on Humans:	No other effects known.
Special Remarks on Chronic Effects on Humans:	Repeated long-term exposure to lower concentrations may cause chronic irritation to the eyes and upper respiratory system.
Special Remarks on Other Effects on Humans:	Exposure to liquid or high concentrations of gas is a severe irritant, and may cause burning and tearing of the eyes, runny nose, coughing, chest pains, and death. May cause severe delayed breathing difficulties. May cause temporary blindness and severe eye damage, and burning and blistering of the skin. 100-200 ppm produced moderate to severe eye irritation. **Human Experience:** Inhalation; human volunteers: Nasal and pulmonary irritation at concentrations of about 100 ppm and higher.

Section XII - Ecological Information

Ecotoxicity:	**Acute Toxicity to Fish** : 96-h: LC_{50}= 0.09 – 3.51 mg un-ionized NH_3/L; **Chronic Toxicity to Fish**: Various 12 d-5 yrs: NOEC=0.025-1.2 mg un-ionized NH_3/L. **Acute Toxicity to Aquatic Invertebrates**: (*Daphnia magna*) 48 h LC_{50} = 2.94 mg un-ionized NH_3-N/L. **Chronic Toxicity to Aquatic Invertebrates**: (*Daphnia magna & others*) 21 d-76 weeks: NOEC = 0.163-0.42 mg un-ionized NH_3/L. **Toxicity to Aquatic Plants** (*Benthic diatoms*) Up to 25 days: LOEC = 0.5-1.0 mg N/L (*Chlorella vulgaris*) 21 days: LOEC = 500 mg N/L. **Slightly toxic to aquatic organisms as defined by USEPA.**
Environmental Fate:	**Stability in water:** Ke=25.6-47.3 cm/h at 15.2-15.0 °C. Removed from aquatic systems. **Stability in Soil:** Mean sorptions; sand: 19% loam: 28% clay, clay loam, and silt loam: 38%. **Monitoring Data:** levels of ammonia in urban areas are on average about 20 Φg/m^3. Non-urban sites have average levels of 4-5 Φg/m^3. Areas close to point sources (e.g., large animal feedlots or industrial sites) may have local atmospheric concentrations exceeding 200 Φg/m^3. **Transport:** the primary methods of transport in the atmosphere are via verticle and horizontal diffusion. **Distribution:** 99.98% to air, <0.1% each to water, soil, biota, and sediment
Toxicity:	No known toxicity.
Degradation Products:	Inorganic. **Photodegradation**: Undergoes photolytic degradation. **Biodegradation**: Aerobic. BOD created within days. Rapidly biodegraded. **Bioaccumuation**: Rapidly assimilated by animals and plants.

Section XIII - Disposal Considerations

Product Name: **Anhydrous Ammonia**

Product Disposal: Disposal of Anhydrous or Aqueous Ammonia may be subject to federal, state and local regulations. Receiving waters must not exceed established limitations for ammonia or its salts.

General Comments: Users of this product should review their operations in terms of applicable federal, state and local laws and regulations, then consult with appropriate regulatory agencies before discharging or disposing of waste material.

Section XIV - Transportation Information

	USDOT	TDG - Canada
Proper Shipping Name:	Ammonia, Anhydrous	Ammonia Anhydrous, Liquefied
Hazard Class:	2.2	2.4 (9.2)
Identification Number:	UN1005	UN1005
Packing Group (Technical Name):		PK GP X, Special Commodity
Labeling / Placarding:	Non-flammable Gas	Corrosive Gas

Authorized Packaging: **Rail** DOT 105-A 112S 114S 112J 112T 114J 114T **Truck** DOT 51 MC330 MC331

Notes: **MARKING**: AMMONIA, ANHYDROUS or AMMONIA, ANHYDROUS LIQUEFIED
If Anhydrous Ammonia has less than 0.2% water by weight, it must ship in an NQT Cargo tank.
All Anhydrous Ammonia is Inhalation Hazard. **USDOT**: Inhalation Hazard (contains 0.2% water) – to follow Identification Number. (If metallurgical or refrigeration grade omit "contains...0.2 and for truck shipments must show "Not for Q and T Tanks") **TDG-Canada**: Inhalation Hazard (Corrosive gas) If product exceeds the CERCLA Reportable Quantity, the notation "RQ" shall be added before and after before the basic shipping description.

European Transportation: International shipments: RQ, Ammonia Anhydrous 2.3, 1005 MUST BE PLACARDED: POISON GAS and MUST BE MARKED: POISON INHALATION HAZARD

Section XV - Regulatory Information

UNITED STATES:

SARA Hazard Category: This product has been reviewed according to the EPA Hazard Categories promulgated under Section 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

Fire: Yes **Pressure Generating:** Yes **Reactivity:** No **Acute:** Yes **Chronic:** No

40 CFR Part 355-Extremely Hazardous Substances: Ammonia
40 CFR Part 370 - Hazardous Chemical Reporting: Applicable Applicable
All intentional ingredients listed on the TSCA inventory.

SARA Title III Information: This product contains the follwing substances subject to the reporting requirements of Title III (EPCRA) of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372

Chemical	CAS No.	Percent by Weight	CERCLA RQ (lbs)	SARA (1986) Reporting		
				311	312	313
Ammonia	7664-41-7	99.5-100	100	Yes	Yes	Yes

CERCLA/ Superfund 40 CFR Parts 117, 302: If this product contains components subject to substances designated as CERCLA Reportable Quantity (RA) Substances, it will be designated in the above table with the RQ value in pounds. If there is a release of RQ Substance to the environment, notification to the National Response Center, Washington D.C. (1-800-424-8802) is required.

CANADA:

WHMIS Hazard Symbol and Classification: This product is WHMIS controlled. Category A (Compressed Gas) D1b(Poisonous and infectious material, acutely toxic (LD50 < 200 mg/kg), E (Corrosive)

Ingredient Disclosure List: This product does contain ingredient(s) on this list.

Environmental Protection: All intentional ingredients are listed on the DSL (Domestic Substance List).

EINECS#: (Ammonia, anhydrous) 231-635-3
California: Prop 65: This is not a chemical known to cause cancer, nor is it listed.

Section XVI - Other Information

NFPA Hazard Ratings: **Health:** 3 **Fire:** 1 **Reactivity:** 0 **Special Hazards:**

0 = Insignificant 1 = Slight 2= Moderate 3 = High 4= Extreme

Comments:

Section(s) changed since last revision: III, V, IX, XI, XII, XV

20. Designated Facility Owner or Operator: Certification of receipt of hazardous materials covered by the manifest except as noted in Item 18a
Printed/Typed Name | Signature | Month | Day | Year

EPA Form 8700-22 (Rev. 3-05) Previous editions are obsolete. **GENERATOR'S INITIAL COPY**

U.S. EPA Form 8700-22

Read all instructions before completing this form.

1. This form has been designed for use on a 12-pitch (elite) typewriter which is also compatible with standard computer printers; a firm point pen may also be used—press down hard.
2. Federal regulations require generators and transporters of hazardous waste and owners or operators of hazardous waste treatment, storage, and disposal facilities to complete this form (EPA Form 8700–22) and, if necessary, the continuation sheet (EPA Form 8700–22A) for both inter- and intrastate transportation of hazardous waste.

Public reporting burden for this collection of information is estimated to average: 30 minutes for generators, 10 minutes for transporters, and 25 minutes for owners or operators of treatment, storage, and disposal facilities. This includes time for reviewing instructions, gathering data, completing, reviewing and transmitting the form. Any correspondence regarding the PRA burden statement for the manifest must be sent to the Director of the Collection Strategies Division in EPA's Office of Information Collection at the following address: U.S. Environmental Protection Agency (2822T), 1200 Pennsylvania Ave., NW., Washington, DC 20460. Do not send the completed form to this address.

I. Instructions for Generators

Item 1. Generator's U.S. EPA Identification Number

Enter the generator's U.S. EPA twelve digit identification number, or the State generator identification number if the generator site does not have an EPA identification number.

Item 2. Page 1 of ___

Enter the total number of pages used to complete this Manifest (*i.e.*, the first page (EPA Form 8700-22) plus the number of Continuation Sheets (EPA Form 8700-22A), if any).

Item 3. Emergency Response Phone Number

Enter a phone number for which emergency response information can be obtained in the event of an incident during transportation. The emergency response phone number must:

1. Be the number of the generator or the number of an agency or organization who is capable of and accepts responsibility for providing detailed information about the shipment;
2. Reach a phone that is monitored 24 hours a day at all times the waste is in transportation (including transportation related storage); and
3. Reach someone who is either knowledgeable of the hazardous waste being shipped and has comprehensive emergency response and spill cleanup/incident mitigation information for the material being shipped or has immediate access to a person who has that knowledge and information about the shipment.

Note: Emergency Response phone number information should only be entered in Item 3 when there is one phone number that applies to all the waste materials described in Item 9b. If a situation (*e.g.*, consolidated shipments) arises where more than one Emergency Response phone number applies to the various wastes listed on the manifest, the phone numbers associated with each specific material should be entered after its description in Item 9b.

Item 4. Manifest Tracking Number

This unique tracking number must be pre-printed on the manifest by the forms printer.

Item 5. Generator's Mailing Address, Phone Number and Site Address

Enter the name of the generator, the mailing address to which the completed manifest signed by the designated facility should be mailed, and the generator's telephone number. Note, the telephone number (including area code) should be the normal business number for the generator, or the number where the generator or his authorized agent may be reached to provide instructions in the event the designated and/or alternate (if any) facility rejects some or all of the shipment. Also enter the physical site address from which the shipment originates only if this address is different than the mailing address.

Item 6. Transporter 1 Company Name, and U.S. EPA ID Number

Enter the company name and U.S. EPA ID number of the first transporter who will transport the waste. Vehicle or driver information may not be entered here.

Item 7. Transporter 2 Company Name and U.S. EPA ID Number

If applicable, enter the company name and U.S. EPA ID number of the second transporter who will transport the waste. Vehicle or driver information may not be entered here.

If more than two transporters are needed, use a Continuation Sheet(s) (EPA Form 8700-22A).

Item 8. Designated Facility Name, Site Address, and U.S. EPA ID Number

Enter the company name and site address of the facility designated to receive the waste listed on this manifest. Also enter the facility's phone number and the U.S. EPA twelve digit identification number of the facility.

Item 9. U.S. DOT Description (Including Proper Shipping Name, Hazard Class or Division, Identification Number, and Packing Group)

Item 9a. If the wastes identified in Item 9b consist of both hazardous and nonhazardous materials, then identify the hazardous materials by entering an "X" in this item next to the corresponding hazardous material identified in Item 9b.

Item 9b. Enter the U.S. DOT Proper Shipping Name, Hazard Class or Division, Identification Number (UN/NA) and Packing Group for each waste as identified in 49 CFR 172. Include technical name(s) and reportable quantity references, if applicable.

Note: If additional space is needed for waste descriptions, enter these additional descriptions in Item 27 on the Continuation Sheet (EPA Form 8700-22A). Also, if more than one Emergency Response phone number applies to the various wastes described in either Item 9b or Item 27, enter applicable Emergency Response phone numbers immediately following the shipping descriptions for those Items.

Item 10. Containers (Number and Type)

Enter the number of containers for each waste and the appropriate abbreviation from Table I (below) for the type of container.

TABLE I.--TYPES OF CONTAINERS

BA = Burlap, cloth, paper, or plastic bags.	DT = Dump truck.
CF = Fiber or plastic boxes, cartons, cases.	DW = Wooden drums, barrels, kegs.
CM = Metal boxes, cartons, cases (including roll-offs).	HG = Hopper or gondola cars.
CW = Wooden boxes, cartons, cases.	TC = Tank cars.
CY = Cylinders.	TP = Portable tanks.
DF = Fiberboard or plastic drums, barrels, kegs.	TT = Cargo tanks (tank trucks).
DM = Metal drums, barrels, kegs.	

Item 11. Total Quantity

Enter, in designated boxes, the total quantity of waste. Round partial units to the nearest whole unit, and *do not* enter decimals or fractions. To the extent practical, report quantities using appropriate units of measure that will allow you to report quantities with precision. Waste quantities entered should be based on actual measurements or reasonably accurate estimates of actual quantities shipped. Container capacities are not acceptable as estimates.

Item 12. Units of Measure (Weight/Volume)

Enter, in designated boxes, the appropriate abbreviation from Table II (below) for the unit of measure.

TABLE II.--UNITS OF MEASURE

G = Gallons (liquids only).	N = Cubic Meters.
K = Kilograms.	P = Pounds.
L = Liters (liquids only).	T = Tons (2000 Pounds).
M = Metric Tons (1000 kilograms).	Y = Cubic Yards.

Note: Tons, Metric Tons, Cubic Meters, and Cubic Yards should only be reported in connection with very large bulk shipments, such as rail cars, tank trucks, or barges.

Item 13. Waste Codes

Enter up to six federal and state waste codes to describe each waste stream identified in Item 9b. State waste codes that are not redundant with federal codes must be entered here, in addition to the federal waste codes which are most representative of the properties of the waste.

Item 14. Special Handling Instructions and Additional Information

1. Generators may enter any special handling or shipment-specific information necessary for the proper management or tracking of the materials under the generator's or other handler's business processes, such as waste profile numbers, container codes, bar codes, or response guide numbers. Generators also may use this space to enter additional descriptive information about their shipped materials, such as chemical names, constituent percentages, physical state, or specific gravity of wastes identified with volume units in Item 12.
2. This space may be used to record limited types of federally required information for which there is no specific space provided on the manifest, including any alternate facility designations; the manifest tracking number of the original manifest for rejected wastes and residues that are re-shipped under a second manifest; and the specification of PCB waste descriptions and PCB out-of-service dates required under 40 CFR 761.207. Generators, however, cannot be required to enter information in this space to meet state regulatory requirements.

Item 15. Generator's/Offeror's Certifications

1. The generator must read, sign, and date the waste minimization certification statement. In signing the waste minimization certification statement, those generators who have not been exempted by statute or regulation from the duty to make a waste minimization certification under section 3002(b) of RCRA are also certifying that they have complied with the waste minimization requirements. The Generator's Certification also contains the required attestation that the shipment has been properly prepared and is in proper condition for transportation (the shipper's certification). The content of the shipper's certification statement is as follows: "I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name, and are classified, packaged, marked and labeled/placarded, and are in all respects in proper condition for transport according to applicable international and national governmental regulations. If export shipment and I am the Primary Exporter, I certify that the contents of this consignment conform to the terms of the attached EPA Acknowledgment of Consent." When a party other than the generator prepares the shipment for transportation, this party may also sign the shipper's certification statement as the offeror of the shipment.
2. Generator or Offeror personnel may preprint the words, "On behalf of" in the signature block or may hand write this statement in the signature block prior to signing the generator/offeror certification, to indicate that the individual signs as the employee or agent of the named principal.

Note: All of the above information except the handwritten signature required in Item 15 may be pre-printed.

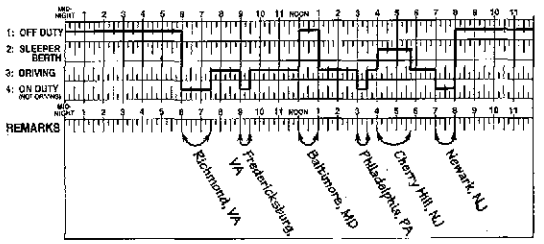
Sample Completed Grid

The following grid illustrates how a driver's duty status should be recorded for a trip from Richmond, Virginia, to Newark, New Jersey. The grid reflects the midnight-to-midnight 24-hour period.



Graph Grid (midnight to midnight operation)

The driver in this instance reported for duty at the motor carrier's terminal. The driver reported for work at 6 a.m., helped load, checked with dispatch, made a pretrip inspection, and performed other duties until 7:30 a.m. when the driver began driving. At 9 a.m. the driver had a minor accident in Fredericksburg, Virginia, and spent one half hour handling details with the local police. The driver arrived at the company's Baltimore, Maryland, terminal at noon and went to lunch while minor repairs were made to the tractor. At 1 p.m. the driver resumed the trip and made a delivery in Philadelphia, Pennsylvania, between 3 p.m. and 3:30 p.m. at which time the driver started driving again. Upon arrival at Cherry Hill, New Jersey, at 4 p.m., the driver entered the sleeper berth for a rest break until 5:45 p.m. at which time the driver resumed driving again. At 7 p.m. the driver arrived at the company's terminal in Newark, New Jersey. Between 7 p.m. and 8 p.m. the driver prepared the required paperwork including completing the driver's record of duty status, driver vehicle inspection report, insurance report for the Fredericksburg, Virginia accident, checked for the next day's dispatch, etc. At 8 p.m., the driver went off duty.

EZ Explanations®

Main Points of 2005 Hours of Service Regulations (Property-Carrying Vehicles)

© J. J. Keller & Associates, Inc.

- **Off-duty time:** 10 consecutive hours.
- **On-duty time:** 14 consecutive hours after coming on duty.
- **Driving time:** 11 hours.
- **Weekly limits:** 60 hours/7 days or 70 hours/8 days (no change).
- **34-hour restart:** The 60/70-hour clock may restart after 34 consecutive hours off duty.
- **Split sleeper berth:** One period of at least 8 (but less than 10) consecutive hours in the sleeper berth; and a separate period, before or after the 8-hour period, of at least 2 (but less than 10) consecutive hours. The 2-consecutive-hour period may be in the sleeper berth, off duty, or any combination of the two. The 8-hour period will not be counted as part of the 14 hours, but the 2-hour period will be counted as part of the 14 hours. Following the second period, hours available under the 11-hour and 14-hour rules must be re-calculated from the end of the first of the two periods.
- **Short-haul 16-hour exception:** The 14-hour on-duty period can be extended to 16 hours if driver has been released from duty at the normal work reporting location for the previous 5 duty tours, is released from duty at the normal work reporting location within 16 hours, and has not used exception in the previous 6 days (except following a 34-hour restart of a 7/8-day period).
- **Compliance Date:** October 1, 2005

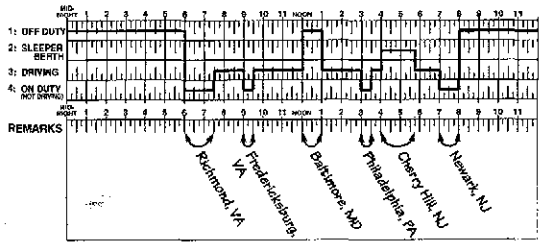
Sample Completed Grid

The following grid illustrates how a driver's duty status should be recorded for a trip from Richmond, Virginia, to Newark, New Jersey. The grid reflects the midnight-to-midnight 24-hour period.



Graph Grid (midnight to midnight operation)

The driver in this instance reported for duty at the motor carrier's terminal. The driver reported for work at 6 a.m., helped load, checked with dispatch, made a pretrip inspection, and performed other duties until 7:30 a.m. when the driver began driving. At 9 a.m. the driver had a minor accident in Fredericksburg, Virginia, and spent one half hour handling details with the local police. The driver arrived at the company's Baltimore, Maryland, terminal at noon and went to lunch while minor repairs were made to the tractor. At 1 p.m. the driver resumed the trip and made a delivery in Philadelphia, Pennsylvania, between 3 p.m. and 3:30 p.m. at which time the driver started driving again. Upon arrival at Cherry Hill, New Jersey, at 4 p.m., the driver entered the sleeper berth for a rest break until 5:45 p.m. at which time the driver resumed driving again. At 7 p.m. the driver arrived at the company's terminal in Newark, New Jersey. Between 7 p.m. and 8 p.m. the driver prepared the required paperwork including completing the driver's record of duty status, driver vehicle inspection report, insurance report for the Fredericksburg, Virginia accident, checked for the next day's dispatch, etc. At 8 p.m., the driver went off duty.

EZ Explanations®

Main Points of 2005 Hours of Service Regulations (Property-Carrying Vehicles)

© J. J. Keller & Associates, Inc.

- **Off-duty time:** 10 consecutive hours.
- **On-duty time:** 14 consecutive hours after coming on duty.
- **Driving time:** 11 hours.
- **Weekly limits:** 60 hours/7 days or 70 hours/8 days (no change).
- **34-hour restart:** The 60/70-hour clock may restart after 34 consecutive hours off duty.
- **Split sleeper berth:** One period of at least 8 (but less than 10) consecutive hours in the sleeper berth; and a separate period, before or after the 8-hour period, of at least 2 (but less than 10) consecutive hours. The 2-consecutive-hour period may be in the sleeper berth, off duty, or any combination of the two. The 8-hour period will not be counted as part of the 14 hours, but the 2-hour period will be counted as part of the 14 hours. Following the second period, hours available under the 11-hour and 14-hour rules must be re-calculated from the end of the first of the two periods.
- **Short-haul 16-hour exception:** The 14-hour on-duty period can be extended to 16 hours if driver has been released from duty at the normal work reporting location for the previous 5 duty tours, is released from duty at the normal work reporting location within 16 hours, and has not used exception in the previous 6 days (except following a 34-hour restart of a 7/8-day period).
- **Compliance Date:** October 1, 2005

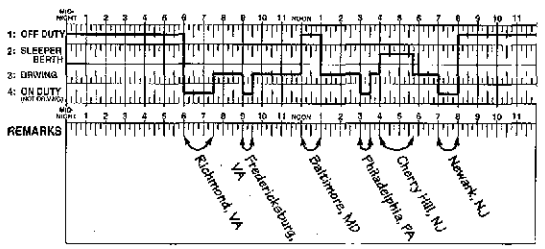
Sample Completed Grid

The following grid illustrates how a driver's duty status should be recorded for a trip from Richmond, Virginia, to Newark, New Jersey. The grid reflects the midnight-to-midnight 24-hour period.



Graph Grid (midnight to midnight operation)

The driver in this instance reported for duty at the motor carrier's terminal. The driver reported for work at 6 a.m., helped load, checked with dispatch, made a pretrip inspection,. and performed other duties until 7:30 a.m. when the driver began driving. At 9 a.m. the driver had a minor accident in Fredericksburg, Virginia, and spent one half hour handling details with the local police. The driver arrived at the company's Baltimore, Maryland, terminal at noon and went to lunch while minor repairs were made to the tractor. At 1 p.m. the driver resumed the trip and made a delivery in Philadelphia, Pennsylvania, between 3 p.m. and 3:30 p.m. at which time the driver started driving again. Upon arrival at Cherry Hill, New Jersey, at 4 p.m., the driver entered the sleeper berth for a rest break until 5:45 p.m. at which time the driver resumed driving again. At 7 p.m. the driver arrived at the company's terminal in Newark, New Jersey. Between 7 p.m. and 8 p.m. the driver prepared the required paperwork including completing the driver's record of duty status, driver vehicle inspection report, insurance report for the Fredericksburg, Virginia accident, checked for the next day's dispatch, etc. At 8 p.m., the driver went off duty.

eZ Explanations®

Main Points of 2005 Hours of Service Regulations (Property-Carrying Vehicles)

© J. J. Keller & Associates, Inc.

- **Off-duty time:** 10 consecutive hours.
- **On-duty time:** 14 consecutive hours after coming on duty.
- **Driving time:** 11 hours.
- **Weekly limits:** 60 hours/7 days or 70 hours/8 days (no change).
- **34-hour restart:** The 60/70-hour clock may restart after 34 consecutive hours off duty.
- **Split sleeper berth:** One period of at least 8 (but less than 10) consecutive hours in the sleeper berth; and a separate period, before or after the 8-hour period, of at least 2 (but less than 10) consecutive hours. The 2-consecutive-hour period may be in the sleeper berth, off duty, or any combination of the two. The 8-hour period will not be counted as part of the 14 hours, but the 2-hour period will be counted as part of the 14 hours. Following the second period, hours available under the 11-hour and 14-hour rules must be re-calculated from the end of the first of the two periods.
- **Short-haul 16-hour exception:** The 14-hour on-duty period can be extended to 16 hours if driver has been released from duty at the normal work reporting location for the previous 5 duty tours, is released from duty at the normal work reporting location within 16 hours, and has not used exception in the previous 6 days (except following a 34-hour restart of a 7/8-day period).
- **Compliance Date:** October 1, 2005

The property described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or as to any said over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submitted to Shipper or the "Billed to" party and sent to:

CONSIGNED TO :
CES Environmental Services, Inc.
4904 Griggs Rd.
Houston , TX 77021

CARRIER :
CES Environmental Services, Inc.
4904 Griggs Rd.
Houston , TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Shipment moves between to ports by a carrier by water, the law requires that the Bill of Lading shall state whether it is "carrier's or shipper's weight."

Intermodal Certificate: All information required by Federal Highway Administration regulations at 49 CFR 390.5(d) implementing the Intermodal Safe Container Act of 1992 is set forth on the face of this bill of lading. The shipper name herein is the tendering party.

EPA Form 8700-22 (Rev. 3-05) Previous editions are obsolete.

GENERATOR'S INITIAL COPY

U.S. EPA Form 8700-22

Read all instructions before completing this form.

1. This form has been designed for use on a 12-pitch (elite) typewriter which is also compatible with standard computer printers; a firm point pen may also be used—press down hard.
2. Federal regulations require generators and transporters of hazardous waste and owners or operators of hazardous waste treatment, storage, and disposal facilities to complete this form (EPA Form 8700–22) and, if necessary, the continuation sheet (EPA Form 8700–22A) for both inter- and intrastate transportation of hazardous waste.

Public reporting burden for this collection of information is estimated to average: 30 minutes for generators, 10 minutes for transporters, and 25 minutes for owners or operators of treatment, storage, and disposal facilities. This includes time for reviewing instructions, gathering data, completing, reviewing and transmitting the form. Any correspondence regarding the PRA burden statement for the manifest must be sent to the Director of the Collection Strategies Division in EPA's Office of Information Collection at the following address: U.S. Environmental Protection Agency (2822T), 1200 Pennsylvania Ave., NW., Washington, DC 20460. Do not send the completed form to this address.

I. Instructions for Generators

Item 1. Generator's U.S. EPA Identification Number

Enter the generator's U.S. EPA twelve digit identification number, or the State generator identification number if the generator site does not have an EPA identification number.

Item 2. Page 1 of _

Enter the total number of pages used to complete this Manifest (*i.e.*, the first page (EPA Form 8700-22) plus the number of Continuation Sheets (EPA Form 8700-22A), if any).

Item 3. Emergency Response Phone Number

Enter a phone number for which emergency response information can be obtained in the event of an incident during transportation. The emergency response phone number must:

1. Be the number of the generator or the number of an agency or organization who is capable of and accepts responsibility for providing detailed information about the shipment;
2. Reach a phone that is monitored 24 hours a day at all times the waste is in transportation (including transportation related storage); and
3. Reach someone who is either knowledgeable of the hazardous waste being shipped and has comprehensive emergency response and spill cleanup/incident mitigation information for the material being shipped or has immediate access to a person who has that knowledge and information about the shipment.

Note: Emergency Response phone number information should only be entered in Item 3 when there is one phone number that applies to all the waste materials described in Item 9b. If a situation (*e.g.*, consolidated shipments) arises where more than one Emergency Response phone number applies to the various wastes listed on the manifest, the phone numbers associated with each specific material should be entered after its description in Item 9b.

Item 4. Manifest Tracking Number

This unique tracking number must be pre-printed on the manifest by the forms printer.

Item 5. Generator's Mailing Address, Phone Number and Site Address

Enter the name of the generator, the mailing address to which the completed manifest signed by the designated facility should be mailed, and the generator's telephone number. Note, the telephone number (including area code) should be the normal business number for the generator, or the number where the generator or his authorized agent may be reached to provide instructions in the event the designated and/or alternate (if any) facility rejects some or all of the shipment. Also enter the physical site address from which the shipment originates only if this address is different than the mailing address.

Item 6. Transporter 1 Company Name, and U.S. EPA ID Number

Enter the company name and U.S. EPA ID number of the first transporter who will transport the waste. Vehicle or driver information may not be entered here.

Item 7. Transporter 2 Company Name and U.S. EPA ID Number

If applicable, enter the company name and U.S. EPA ID number of the second transporter who will transport the waste. Vehicle or driver information may not be entered here.

If more than two transporters are needed, use a Continuation Sheet(s) (EPA Form 8700-22A).

Item 8. Designated Facility Name, Site Address, and U.S. EPA ID Number

Enter the company name and site address of the facility designated to receive the waste listed on this manifest. Also enter the facility's phone number and the U.S. EPA twelve digit identification number of the facility.

Item 9. U.S. DOT Description (Including Proper Shipping Name, Hazard Class or Division, Identification Number, and Packing Group)

Item 9a. If the wastes identified in Item 9b consist of both hazardous and nonhazardous materials, then identify the hazardous materials by entering an "X" in this Item next to the corresponding hazardous material identified in Item 9b.

Item 9b. Enter the U.S. DOT Proper Shipping Name, Hazard Class or Division, Identification Number (UN/NA) and Packing Group for each waste as identified in 49 CFR 172. Include technical name(s) and reportable quantity references, if applicable.

Note: If additional space is needed for waste descriptions, enter these additional descriptions in Item 27 on the Continuation Sheet (EPA Form 8700-22A). Also, if more than one Emergency Response phone number applies to the various wastes described in either Item 9b or Item 27, enter applicable Emergency Response phone numbers immediately following the shipping descriptions for those Items.

Item 10. Containers (Number and Type)

Enter the number of containers for each waste and the appropriate abbreviation from Table I (below) for the type of container.

TABLE I.--TYPES OF CONTAINERS

BA = Burlap, cloth, paper, or plastic bags.	DT = Dump truck.
CF = Fiber or plastic boxes, cartons, cases.	DW = Wooden drums, barrels, kegs.
CM = Metal boxes, cartons, cases (including roll-offs).	HG = Hopper or gondola cars.
CW = Wooden boxes, cartons, cases.	TC = Tank cars.
CY = Cylinders.	TP = Portable tanks.
DF = Fiberboard or plastic drums, barrels, kegs.	TT = Cargo tanks (tank trucks).
DM = Metal drums, barrels, kegs.	

Item 11. Total Quantity

Enter, in designated boxes, the total quantity of waste. Round partial units to the nearest whole unit, and *do not* enter decimals or fractions. To the extent practical, report quantities using appropriate units of measure that will allow you to report quantities with precision. Waste quantities entered should be based on actual measurements or reasonably accurate estimates of actual quantities shipped. Container capacities are not acceptable as estimates.

Item 12. Units of Measure (Weight/Volume)

Enter, in designated boxes, the appropriate abbreviation from Table II (below) for the unit of measure.

TABLE II.--UNITS OF MEASURE

G = Gallons (liquids only).	N = Cubic Meters.
K = Kilograms.	P = Pounds.
L = Liters (liquids only).	T = Tons (2000 Pounds).
M = Metric Tons (1000 kilograms).	Y = Cubic Yards.

Note: Tons, Metric Tons, Cubic Meters, and Cubic Yards should only be reported in connection with very large bulk shipments, such as rail cars, tank trucks, or barges.

Item 13. Waste Codes

Enter up to six federal and state waste codes to describe each waste stream identified in Item 9b. State waste codes that are not redundant with federal codes must be entered here, in addition to the federal waste codes which are most representative of the properties of the waste.

Item 14. Special Handling Instructions and Additional Information

1. Generators may enter any special handling or shipment-specific information necessary for the proper management or tracking of the materials under the generator's or other handler's business processes, such as waste profile numbers, container codes, bar codes, or response guide numbers. Generators also may use this space to enter additional descriptive information about their shipped materials, such as chemical names, constituent percentages, physical state, or specific gravity of wastes identified with volume units in Item 12.
2. This space may be used to record limited types of federally required information for which there is no specific space provided on the manifest, including any alternate facility designations; the manifest tracking number of the original manifest for rejected wastes and residues that are re-shipped under a second manifest; and the specification of PCB waste descriptions and PCB out-of-service dates required under 40 CFR 761.207. Generators, however, cannot be required to enter information in this space to meet state regulatory requirements.

Item 15. Generator's/Offeror's Certifications

1. The generator must read, sign, and date the waste minimization certification statement. In signing the waste minimization certification statement, those generators who have not been exempted by statute or regulation from the duty to make a waste minimization certification under section 3002(b) of RCRA are also certifying that they have complied with the waste minimization requirements. The Generator's Certification also contains the required attestation that the shipment has been properly prepared and is in proper condition for transportation (the shipper's certification). The content of the shipper's certification statement is as follows: "I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name, and are classified, packaged, marked and labeled/placarded, and are in all respects in proper condition for transport according to applicable international and national governmental regulations. If export shipment and I am the Primary Exporter, I certify that the contents of this consignment conform to the terms of the attached EPA Acknowledgment of Consent." When a party other than the generator prepares the shipment for transportation, this party may also sign the shipper's certification statement as the offeror of the shipment.
2. Generator or Offeror personnel may preprint the words, "On behalf of" in the signature block or may hand write this statement in the signature block prior to signing the generator/offeror certification, to indicate that the individual signs as the employee or agent of the named principal.

Note: All of the above information except the handwritten signature required in Item 15 may be pre-printed.

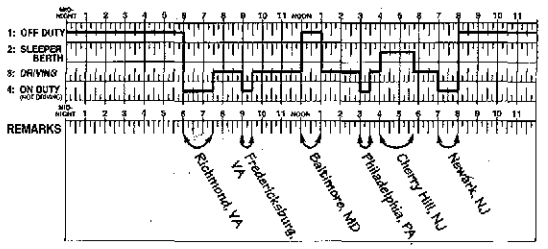
Sample Completed Grid

The following grid illustrates how a driver's duty status should be recorded for a trip from Richmond, Virginia, to Newark, New Jersey. The grid reflects the midnight-to-midnight 24-hour period.



Graph Grid (midnight to midnight operation)

The driver in this instance reported for duty at the motor carrier's terminal. The driver reported for work at 6 a.m., helped load, checked with dispatch, made a pretrip inspection, and performed other duties until 7:30 a.m. when the driver began driving. At 9 a.m. the driver had a minor accident in Fredericksburg, Virginia, and spent one half hour handling details with the local police. The driver arrived at the company's Baltimore, Maryland, terminal at noon and went to lunch while minor repairs were made to the tractor. At 1 p.m. the driver resumed the trip and made a delivery in Philadelphia, Pennsylvania, between 3 p.m. and 3:30 p.m. at which time the driver started driving again. Upon arrival at Cherry Hill, New Jersey, at 4 p.m., the driver entered the sleeper berth for a rest break until 5:45 p.m. at which time the driver resumed driving again. At 7 p.m. the driver arrived at the company's terminal in Newark, New Jersey. Between 7 p.m. and 8 p.m. the driver prepared the required paperwork including completing the driver's record of duty status, driver vehicle inspection report, insurance report for the Fredericksburg, Virginia accident, checked for the next day's dispatch, etc. At 8 p.m., the driver went off duty.

eZ Explanations®

Main Points of 2005 Hours of Service Regulations (Property-Carrying Vehicles)

© J. J. Keller & Associates, Inc.

- **Off-duty time:** 10 consecutive hours.
- **On-duty time:** 14 consecutive hours after coming on duty.
- **Driving time:** 11 hours.
- **Weekly limits:** 60 hours/7 days or 70 hours/8 days (no change).
- **34-hour restart:** The 60/70-hour clock may restart after 34 consecutive hours off duty.
- **Split sleeper berth:** One period of at least 8 (but less than 10) consecutive hours in the sleeper berth; and a separate period, before or after the 8-hour period, of at least 2 (but less than 10) consecutive hours. The 2-consecutive-hour period may be in the sleeper berth, off duty, or any combination of the two. The 8-hour period will not be counted as part of the 14 hours, but the 2-hour period will be counted as part of the 14 hours. Following the second period, hours available under the 11-hour and 14-hour rules must be re-calculated from the end of the first of the two periods.
- **Short-haul 16-hour exception:** The 14-hour on-duty period can be extended to 16 hours if driver has been released from duty at the normal work reporting location for the previous 5 duty tours, is released from duty at the normal work reporting location within 16 hours, and has not used exception in the previous 6 days (except following a 34-hour restart of a 7/8-day period).
- **Compliance Date:** October 1, 2005

Maximum Handling Temperature	Not determined.
Handling Procedures	Keep containers closed when not in use. Wash thoroughly after handling. Empty container contains product residue which may exhibit hazards of product.
Maximum Storage Temperature	Not determined.
Storage Procedures	No special storage precautions required.
Loading Temperature	Not determined.

8 Exposure Controls/Personal Protection

Exposure Limits

Comp	Exposure Guidelines					
	OSHA		ACGIH		Other	
	TWA	STEL	TWA	STEL	TWA	STEL
Sodium hydroxide	2 mg/cu. M	N/E	N/E	2 mg/cu. M (c)	N/E	N/E

(s) - Skin exposure
(p) - Proposed limit
(c) - Ceiling exposure
(l) - Recommended exposure limit
(u) - Supplier recommended exposure limit
(N/E) - None established

Other Exposure Limits	None known.
Engineering Controls	If use generates a mist or vapor, local exhaust ventilation is recommended. Additional ventilation or exhaust may be required to maintain air concentrations below recommended exposure limits.
Gloves Procedures	Use good industrial hygiene practices to avoid skin contact. If contact with the material may occur wear chemically protective gloves.
Eye Protection	Safety Glasses.
Respiratory Protection	Use NIOSH/MSHA approved full face respirator with a combination organic vapor and dust/mist cartridge if the recommended exposure limit is exceeded. Use self-contained breathing apparatus for entry into confined space, for other poorly ventilated areas and for large spill clean-up sites.
Clothing Recommendation	Wear a chemically protective apron when contact with material may occur. Do not wear rings, watches or similar apparel that could entrap the material and cause a skin reaction.

9 Physical and Chemical Properties

Flash Point	Not applicable.
Upper Flammable Limit	Not determined.

3 Composition/Information on Ingredients

Hazardous Ingredients

Comp	CAS No.	Percentage (by wt.)	Carcinogen
Sodium hydroxide	1310-73-2	From 0 to 10.0 percent	N/E

(N/E) - None established

4 First Aid Measures

Eyes Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice / attention.

Skin Wash immediately with soap and water. Immediately remove contaminated clothing. If skin irritation occurs, get medical attention. Launder contaminated clothing before reuse.

Inhalation Remove exposed person to fresh air. If breathing is labored, administer oxygen. If breathing has stopped, apply artificial respiration. If irritation persists or if toxic symptoms are observed, get medical attention.

Oral DO NOT INDUCE VOMITING. If conscious, give 2 glasses of water. Get immediate medical attention. Call a poison center or doctor if exposed or you feel unwell.

Additional Information Note to physician: Treat symptomatically.

5 Fire Fighting Measures

Flash Point Not applicable.

Extinguishing Media CO2, dry chemical, foam, water spray, water fog.

Firefighting Procedures Recommend wearing self-contained breathing apparatus.

Unusual Fire & Explosion Hazards Material will not burn. Container may rupture on heating.

6 Accidental Release Measures

Spill Procedures Personal Protective Equipment must be worn, see Personal Protection Section for PPE recommendations. Ventilate area if spilled in confined space or other poorly ventilated areas. Prevent entry into sewers and waterways. Pick up free liquid for recycle and/or disposal. Residual liquid can be absorbed on inert material. Neutralize with dilute acid, flush area with water, then cover area with sodium bicarbonate.

7 Handling and Storage

Pumping Temperature Not determined.

EPAHO099000936

Eye Irritation	Moderate to strong eye irritation. Based on data from components or similar material.
Skin Irritation	Skin irritant. Based on data from components or similar materials.
Respiratory Irritation	No data available to indicate product or components may cause respiratory irritation under normal workplace conditions and good industrial hygiene practices.
Dermal Toxicity	The LD50 in rabbits is > 2000 mg/Kg. Based on data from components or similar materials.
Inhalation Toxicity	Not expected to be a toxic inhalation hazard. Based on data available from components or similar materials.
Oral Toxicity	The LD50 in rats is between 2000 mg/kg and 5000 mg/kg. Based on data from components or similar materials. Swallowing this material causes severe irritation and may cause burns of the mouth, esophagus and stomach, abdominal pain, nausea, vomiting and diarrhea.
Dermal Sensitization	No data available to indicate product or components may be a skin sensitizer.
Inhalation Sensitization	No data available to indicate product or components may be respiratory sensitizers.

-- CHRONIC EXPOSURE --

Chronic Toxicity	No data available to indicate product or components present at greater than 1% are chronic health hazards.
Carcinogenicity	No data available to indicate any components present at greater than 0.1% may present a carcinogenic hazard.
Mutagenicity	No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.
Reproductive Toxicity	No data available to indicate either product or components present at greater than 0.1% that may cause reproductive toxicity.
Teratogenicity	No data available to indicate product or any components contained at greater than 0.1% may cause birth defects.

-- ADDITIONAL INFORMATION --

Other	No other health hazards known.

12	Ecological Information

-- ENVIRONMENTAL TOXICITY --

Freshwater Fish Toxicity	The acute LC50 is 100 - 1000 mg/L based on component data.
Freshwater Invertebrates Toxicity	The acute EC50 is 100 - 1000 mg/L based on component data.
Algal Inhibition	The acute EC50 is 100 - 1000 mg/L based on component data.
Saltwater Fish Toxicity	Not determined.
Saltwater Invertebrates Toxicity	The acute LC50 is 100 - 1000 mg/L based on component data.

Lower Flammable Limit	Not determined.
Autoignition Point	Not determined.
Explosion Data	Material does not have explosive properties.
Vapor Pressure	Not determined.
pH	Not determined.
Specific Gravity	0.9 (15.6 °C)
Bulk Density	Not determined.
Water Solubility	Insoluble.
Percent Solid	Not determined.
Percent Volatile	Unknown.
Percent VOC	Not determined.
Vapor Density	Not determined.
Evaporation Rate	Not determined.
Odor	Mild
Appearance	Clear liquid.
Viscosity	Unknown.
Odor Threshold	Unknown.
Boiling Point	Not determined.
Pour Point	Not determined.
Temperature Melting / Freezing Point	Not determined.

The above data are typical values and do not constitute a specification. Vapor pressure data are calculated unless otherwise noted.

10 Stability and Reactivity

Stability	Material is normally stable at moderately elevated temperatures and pressures.
Decomposition Temperature	Not determined.
Incompatibility	Acids.
Polymerization	Will not occur.
Thermal Decomposition	Thermal decomposition and combustion are not expected to occur except under extreme conditions.
Conditions to Avoid	Not determined.

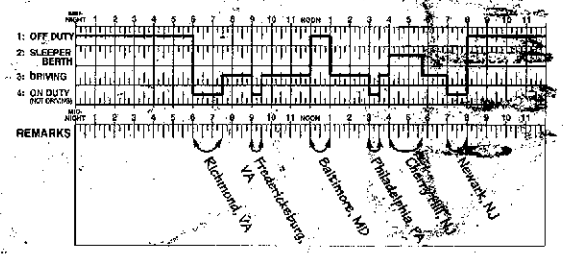
Sample Completed Grid

The following grid illustrates how a driver's duty status should be recorded for a trip from Richmond, Virginia, to Newark, New Jersey. The grid reflects the midnight-to-midnight 24-hour period.



Graph Grid (midnight to midnight operation)

The driver in this instance reported for duty at the motor carrier's terminal. The driver reported for work at 6 a.m., helped load, checked with dispatch, made a pretrip inspection, and performed other duties until 7:30 a.m. when the driver began driving. At 9 a.m. the driver had a minor accident in Fredericksburg, Virginia, and spent one half hour handling details with the local police. The driver arrived at the company's Baltimore, Maryland, terminal at noon and went to lunch while minor repairs were made to the tractor. At 1 p.m. the driver resumed the trip and made a delivery in Philadelphia, Pennsylvania, between 3 p.m. and 3:30 p.m. at which time the driver started driving again. Upon arrival at Cherry Hill, New Jersey, at 4 p.m., the driver entered the sleeper berth for a rest break until 5:45 p.m. at which time the driver resumed driving again. At 7 p.m. the driver arrived at the company's terminal in Newark, New Jersey. Between 7 p.m. and 8 p.m. the driver prepared the required paperwork including completing the driver's record of duty status, driver vehicle inspection report, insurance report for the Fredericksburg, Virginia accident, checked for the next day's dispatch, etc. At 8 p.m., the driver went off duty.

Explanations®

Main Points of 2005 Hours of Service Regulations (Property-Carrying Vehicles)

© J. J. Keller & Associates, Inc.

- **Off-duty time:** 10 consecutive hours.
- **On-duty time:** 14 consecutive hours after coming on duty.
- **Driving time:** 11 hours.
- **Weekly limits:** 60 hours/7 days or 70 hours/8 days (no change).
- **34-hour restart:** The 60/70-hour clock may restart after 34 consecutive hours off duty.
- **Split sleeper berth:** One period of at least 8 (but less than 10) consecutive hours in the sleeper berth; and a separate period, before or after the 8-hour period, of at least 2 (but less than 10) consecutive hours. The 2-consecutive-hour period may be in the sleeper berth, off duty, or any combination of the two. The 8-hour period will not be counted as part of the 14 hours, but the 2-hour period will be counted as part of the 14 hours. Following the second period, hours available under the 11-hour and 14-hour rules must be re-calculated from the end of the first of the two periods.
- **Short-haul 16-hour exception:** The 14-hour on-duty period can be extended to 16 hours if driver has been released from duty at the normal work reporting location for the previous 5 duty tours, is released from duty at the normal work reporting location within 16 hours, and has not used exception in the previous 6 days (except following a 34-hour restart of a 7/8-day period).
- **Compliance Date:** October 1, 2005
