Hi Michael,

I have made a few suggestions to your document. The turnaround time is too tight for more substantial input.

The Engineering Technical Support Center (ETSC) would like to provide technical support for this site, but we have limited staff with PFAS experience and limited resources. We don't want to promise more than we can offer. Please send a request about technical support needs to John McKernan, and we will work with you. We understand that this site is evolving and that technical support request may evolve as well.

Best wishes with your discussions tomorrow,
Carolyn

Subject: RA Briefing Paper and Recommendations Wolverine

All,
Attached is the combined briefing and recommendations paper that we have been working on. As we discussed, I combined it to one doc. Please edit/amend and send back to the team COB tomorrow. If this needs to go to a staff person that I had not included, please pass it along.
I'm not sure if all of you saw this, but a reporter from MLive is seeking comments from us. I'm not sure what we can say right now. Any thoughts?
Additionally, as things come up, or as anyone learns things pertinent to this team's work. Please share. It makes sense to me that we keep up with these planned Tuesday meetings. That said, if anyone thinks we need to gather outside of those, please send out a request to the group.
Thanks,
Michael
