Hunters Point Issues Raised in Greenaction's July 3, 2018, Email:

1. The Parcel A work plan should have gone out for a public comment period, and should comply with CERCLA requirements for public participation.
2. There needs to be independent community oversight of a comprehensive retesting (not just scanning) of the entire site, including parcels transferred and adjacent areas.
3. The "remedy" identified in the Parcel E/E2 Five-Year Review is inadequate and dated.

Deliberative Process / Ex. 5
