All,

Also Linda Gaines in the EPA Headquarters Superfund program Science Policy Branch is a POC for PFAS matters. She may have information on different state numbers for PFAS in drinking water. Her phone number is (703) 603-7189. She is copied on this email message. I previously shared her contact information with the community group "Concerned Citizens for Responsible Redevelopment" and they reported back that she had been very helpful. Thanks Linda!

Joan Tanaka

Remedial Response Branch 1 Chief

Superfund Division

Region 5

Scott:

We have a couple of contacts in Region 5 who should be able to help with Region 5's approach and possibly hook you up with other contacts nationally including our HQ. They are Joan Tanaka and, I believe, Kim Harris. I will make contact with them here in the Region and ensure that they understand what Michigan is doing and connect with you. I hope this will be helpful and if there is anything else you need please let me know.

Mark – thanks for the introduction to Matt to support the Wolverine sites. I know the DEQ has been engaged in regular discussions with EPA reps in support of Wolverine to date. What I was hoping for was to get into contact with EPAs regional and national SMEs on PFAS. As you are aware, there are multiple sites throughout MI that are impacted by PFAS. We (the State) have brought on Dr. David Stavitz from Brown University to serve as an advisor to both DHHS and DEQ. Here's a link to his bio: https://vivo.brown.edu/display/dsavitz

We understand that other states have implemented control measures above the EPA's lifetime health advisory and we are interested in learning more about those. I'm assuming that they did that in concert with the EPA, can you connect us with experts within the EPA on PFAS please?

Thank You,

Scott

Scott,

Sorry for the delay in getting back to you. Matt Mankowski is the point of contact in our program (emergency response) for the Wolverine Sites. I've cc'd him on this message. Our remedial program is EPA's key points of contact on this issue. If you need any support or information from EPA, Matt can connect you to our remedial program coordinators.

Mark
