Hi Bob and John.

Here are the TI sediment data that we requested. Once we have a chance to look at it, can we talk to see how to address this TI sediment issue at Alameda?

Thanks
XM

Alameda BCT,

Attached are the requested data I received from the TI team for stock pile sampling of TI sediments.

As DTSC is the lead regulatory agency, they agreed and documented in the ROD/RA on all sampling and handling procedures.

Attached is UNVALIDATED data for the stockpiles, along with a crude diagram of the piles, as well as some more information from an email sent to DTSC management relative to the history of the piles.

Hope that this answers your questions.

Derek
