Very helpful.

Thanks Miguel.

Hi Paul,

We actually have some sequential data before and after LSL replacement from Flint which I think would be useful so I will send that to you.

Subject: Water Testing Post Full LSL Replacement in Childcare Settings

Marc/Miguel -

Greetings for the New Year!!!

Do either of you have recommendations on the preferred frequency of testing water in childcare settings after full lead service line replacement has occurred as a result of emergency repair by the water utility or part of scheduled infrastructure maintenance?

Right now, our department is recommending bottled water (provided by the utility) for 30 days post LSL full replacement and with testing conducted at various intervals after full replacement for assessment and assurance purposes.

Any recommendations you can provide would be greatly appreciated!

Best,

Paul b.
