> I did provide training for the chicago health department staff on collecting water samples when they do EBLL site visits, which they started to do after our study findings were published. They also provide flushing guidance to residents to clear the high lead-bearing scale and sediment following any disturbance of a lead service line.

Hi Miguel -

Hope all is well. I am currently out of the office but checking emails periodically.

Can you send me any info. that the City of Chicago used as recommendations for citizens to reduce lead conc. in water that also were vetted with Chicago Public Health authorities? Otherwise, can you send me a contact at Chicago Health Department?

best,

paul b.
