Provide a description of actions taken to attempt to achieve compliance prior to entering NA-ECA, including a description of all attempts that were made to locate alternative sources of compliant fuel oil, and a description of the reason why compliant fuel oil was not available

We tried to supply the vsl prior sailing at Kawasaki, Japan, with LSMGO but no contacted supplier was able to deliver due to non availabilities (of barge).

We will arrange for bunker stem at Vancouver BC, which will be supplied immediately after arrival.

Operational constraints, if applicable

Describe any operation constraints that prevented using available compliant fuel oil (e.g. with respect to viscosity or other fuel oil parameters)

Vessel has only abt. 35 mts LSMGO on board, which is insufficient to enter and exit ECA zone.
After having used these 35 mts vessel will have to switch over to LSFO with a sulphur content of 0,96%, which is the fuel with the least sulphur content on board then.

Specify steps you have taken, or are taking, to resolve these operational constraints that will allow you to use all commercially available residual fuel oil blends

We will bunker the vessel immediately on arrival Vancouver BC.

Describe availability of compliant fuel oil at the first port-of-call in Canada, and plans to obtain it.

We will arrange for LSMGO stem at Vancouver BC.

If compliant fuel oil is not available at the first port-of-call in Canada, list the lowest sulphur content of available fuel oil(s) or the lowest sulphur content of available fuel oil at the next port-of-call in Canada

0,96%

If vessel or owner/operator has submitted a Fuel Oil Non-Availability Report to Canada in the previous 12 months, list the number of Fuel Oil Non-Availability Reports previously submitted and provide details on the dates and ports visited while using non-compliant fuel oil as set out below.
