Subject: DUBAI CHARM / 0530087 / LSMGO Bunkers

Good day dear Robert,

Pls be advised that vessel had arrived at Pascagoula Anchorage at 0418 Hrs Lt on 05th Oct 2017 after changing over to LSMGO 0.1% sulphur fuel prior entering ECA area. At that time vessel was scheduled to berth at Chevron Terminal, Pascagoula on 16th Oct 2017.

Berthing has been subsequently delayed to 19th Oct, then to 21st Oct, then 23rd Oct and the latest schedule for vessel's berthing is for 31st Oct 2017. Due to Hurricane Nate, vessel had to move to open waters and maneuvre for 2 days due to adverse weather. Also, vessel is carrying heated cargo which requires regular heating to maintain the cargo temperature as per charterer's instructions. Due to the unexpected long anchorage, slow steaming due to Hurricane and prolonged cargo heating due to delay in berthing, our LSMGO ROB has reduced considerably.

Since, your bunkering department has tried with the suppliers but bunkers can not be supplied at anchorage, and as vessel does not have sufficient LSMGO for all the consumptions at anchorage till 31st Oct, vessel will need to switch over to HSFO until vessel is able to receive LSMGO at berth. We intend to consume HSFO only for Boilers from 18th Oct 2017. We will continue to use LSMGO for generators and also for M/E for maneuvring to berth at Pascagoula.

Pls advise the concerned authorities and revert with their approval.

Thanks and Best Regards,
Capt.Sachin Kumar Ahuja
Master
