FUEL OIL NON AVAILABILTY REPORT

Submitted to the Environmental Protection Agency on June 11th, 2012

On behalf of AET Inc, we would like to notify the US Coast Guard and Environmental Protection Agency that our vessel the Paramount Helsinki (IMO # 9453963 – Isle of Man flagged) will be operating in the North America ECA zone from June 11th to June 16th with non compliant IFO 380 onboard.

We had arranged for LS IFO to be delivered to the Paramount Helsinki at Nederland for their planned port call in Nederland, TX ; however, the previous voyage delayed the vessel from arriving on the date as planned.

As a result the vessel will be running out of LS IFO on June 11th and switching over to the only fuel remaining onboard which is the higher sulphur fuel (RMG – max 3.5%). We have arranged to purchase 1100 metric tons of compliant low sulphur IFO 380 – max 1.00% sulphur from Peninsula Petroleum to be delivered on the next port call which is Lake Charles on June 16th, 2013.

I am attaching a copy of the vessels Q88 , as well as the confirmation from Peninsula for the purchase of the low sulphur IFO 380 fuel in Lake Charles.

I certify under penalty of law that the statements and information made herein are, to the best of my knowledge and belief, true and complete. I am aware that there are significant penalties for knowingly submitting false statements and information, including the possibility of fines and imprisonment pursuant to 18 USC 1001.

Best regards,

Robert Love / AET Inc Limited
