Subject: RE: Riverview Energy comments and responses
Attachments: Riverview ATSD Suggestions 4-17-2019.docx

Hi Doug,

Thanks for sending us the draft technical and organization response to comments for Riverview Energy. I have attached a document containing our suggestions based on our review of your preliminary responses. Our suggestions are aimed at ensuring your proposed responses consider each comment in full since IDEM's final permit decision will be based on what is included in the permit record.

We recognize that you are still working on responding to other comments. We understand that there may be changes between now and when you formally propose the permit to us for our 45-day review. Although we offer suggestions on the draft ATSD, we recognize that IDEM is the permitting authority responsible for making decisions on the permit, including the response to any comments received on the draft permit.

Please feel free to contact me if you have any questions about our suggestions or require additional information.

Thanks,
Michael Langman

Subject: Riverview Energy comments and responses

Good afternoon,

One of the times we talked, you asked about this, and I think you must have discussed it with Jenny Acker, too. In any event, the attached clip from our Addendum to the Technical Support Document includes what I think of as the "technical" and "organization" comments we received and the responses.

To explain some of the sources:

> Ex. 6 Personal Privacy (PP) is a Southwest Indiana resident, a retired environmental compliance manager, who provides comments
>
> Earthjustice is a Philadelphia-based organization that submitted comments on behalf of the Sierra Club and two South Indiana groups, Valley Watch and Southwestern Indiana Citizens for Quality of Life. Valley Watch and SICQL submitted additional comments of their own.
>
> Dr. Sahu and Mr. Gebhart are contractors for Earthjustice.
>
> The ones labeled "EPA" you will probably recognize. I did revise the response to EPA Modeling Comment 6 to deal with the issue about the sulfur recovery units you helped us find a few weeks ago.

Some of the responses cite what we are calling Response to General Statement *n.* This is the way we are trying to deal with the very similar comments submitted by a number for people and groups. I could not include those general issue because the language for all of them is not finished yet. I think the titles attached to each of the general statements will at the least show where those are heading.

Please let me know if there are any questions.
