Carolyn

We have determined that we are starting at the intersection of Forsythe Street and Hamilton Avenue. We will then work our way south along Forsythe Street. We will obtain all samples from west side (south bound lane) of Forsythe Street first and then when we get to the southern end of the sampling area, we will work our way back north on the east side (north bound) of Forsythe Street. We will likely install the Ross Court boring when we get to that intersection as we work our way north along Forsythe Street.

We will then complete the rest of the borings on Hamilton Avenue and near the sewer line running southeast away from Forsythe Street. The onsite borings will be the last borings we complete.

Please let me know if you have further questions or need anything else. We will be arriving at the site next Monday around 8:30 AM and anticipate initiating the drilling activities around 9:30 AM or 10 AM.

Sincerely,

Bradley E. Gentry, LPG

Hi = will call you on Monday, let me know when you decide the order of sampling (north to south, on-site first or last, etc.)
Thanks.

I should have pointed out that our phone system goes through our network so I did not receive your call until now. It looks like we're all set with the IDEM oversight but let me know if you still want me to give you a call. Thank you.
