Notes:
All results are in µg/L.
BGS: Below ground surface.
NA: Not Analyzed.
NE: Not Established.
Groundwater samples were collected by IWM personnel and analyzed at Pace Analytical Services, Inc. in Indianapolis, Indiana.
VOC's were analyzed using SW846 Method 8260.
Unlisted compounds below laboratory detection limits for all samples.
Underlined concentrations exceed RCG Residential Tap Groundwater Screening Levels (GWSLs).
Bolded concentrations exceed RCG Residential Vapor Exposure (VE) GWSLs.
Shaded concentrations exceed RCG Commercial/Industrial VE GWSLs.
Screening Levels obtained from Appendix A, Table A-6 of the Remediation Closure Guide, dated March 22, 2012, with all applicable updates (last updated March 2018).
