**Subject:** RE: Confidential - Sewer Gas Sampling Question

Hi –
EPA concurs with not resampling sewer manholes 250130, 250070, and 250043.
Please provide the addendum as proposed in your email.
Thanks for all the work you are doing.
Carolyn

**Subject:** Confidential - Sewer Gas Sampling Question

Carolyn/Bhooma

Good morning. Given the vast amount of work that has been completed with respect to collection of sewer gas and soil gas data, can you please confirm that the collection of supplemental sewer gas samples from sewer manholes 250130, 250070, and 250043 are necessary. These areas were "cleared" for both soil gas and sewer gas sampling based upon the original sampling events. I would prefer to focus our time and energy on obtaining data from other areas within the Study Area and Extended Study area since the existing lines of evidence should adequately clear the 3 manhole locations identified above. I feel like we should focus our attention and efforts on conducting the supplemental VI residential sampling activities as opposed to duplicating efforts in areas that have already been cleared using multiple lines of evidence.

Once I have your response, then as discussed with you on Monday, we will be submitting a Sewer Gas Sampling Work Plan Addendum outlining the additional sampling we would like to complete south of the original Study Area. This will incorporate 5 new sewer manholes in the Extended Study Area and we will resample existing manholes 250010 and 250020. These manholes need to be sampled again in order to further evaluate the supplemental sewer manhole data.

Thanks and please call me if you have questions or want to discuss anything in more detail.

Sincerely,

Bradley E. Gentry, LPG
