OK, sorry about the formatting issues Juan. We had never been requested to provide the data in that format so it was not something we had readily available. I am also sorry to hear that you will no longer be managing the site, I enjoyed working with you on this project. Please let me know if you or Carolyn decide you need something else from us.

Sincerely,

Bradley E. Gentry, LPG

Brad,

You can hold off of retroactively constructing the data into an EDD format at this time. You are correct in that Carolyn Bury is transitioning into the role as the new RCRA CA Project Manager for this site. The data that you provided me does not allow me to the analyze as thoroughly, due to the data being broken into individual wells separated by lines, as well as not providing all of the column descriptors as in the example I provided you.

Juan

I am following up the earlier email and wanted to confirm that you definitely need this data (knowing that it will take quite a bit of time to get this from the lab, if it can be retroactively generated by the lab)and to find out whether or not we should be copying Carolyn Bury on the submittal since it is my understanding that she is now also involved with this project.

Sincerely,

As we previously discussed Juan, we were never asked to supply EDD's for this project so this is something new that would have to be created. I am not even sure if the lab can do this retroactively and if so, how long it will take. Out of curiosity, why do you need all of the data in laboratory EDD format instead of the excel spreadsheet that we provided?

Sincerely,

That would be great. Could it be fairly quick turnaround?

Juan

If I can get the lab to generate an EDD similar to the spreadsheet titled Lab_Validated_EDD_Example, will that suffice? This appears to be the easiest format to create in short order.

Brad,

Thanks for sending the data, but this wasn't the format I was looking to receive the data in. Refer to attached the files which are example of how Electronic Data Deliverable (EDD) is submitted to us. Essentially, I didn't want a summary of data from you but all of the lab validated data in one database that would allow me to perform whatever analysis I chose to do. Take a look at example files attached and let me know if this would be a format you could resend the data.

Thanks.

Juan

Per your request, please find attached an excel spreadsheet (with 4 different worksheet tabs) which summarize the recovery well and monitoring well groundwater analytical results.

Please let us know if you need anything else.

Sincerely,
