con-test®
ANALYTICAL LABORATORY

Con-Test Analytical Laboratory

With over twenty-five years experience, Con-Test Analytical Laboratory has a state-of-the-art facility and nationwide coverage. The laboratory has capabilities for analyzing nearly all water, air, soil, and solid materials.

A Commitment to Quality

Our laboratory adheres to stringent quality control programs that ensure precision and accuracy data. Including companywide programs, multi-state and national certifications, and audits training and QAPPs.

Environmentally Conscious

Con-Test is an industry leader on the forefront of Sustainability/Green programs to reduce the carbon footprint. Multi-faceted programs include automation, energy efficiency, paper reduction, and solvent recovery systems.

Air Laboratory

- Vapor Intrusion
- Indoor & Ambient Air
- Soil Gas
- MGP Program
- Landfill Gas
- Perimeter Monitoring
- PCBs in air

Soil Testing

- Brownfields
- Phase I/ Phase II
- Remediation
- Due Diligence
- UST Programs
- PFAS in Soil/Sediment

Water Analysis

- PFAS in DW/GW/SW
- Clean Water Act (CWA)
- Resource Conservation & Recovery Act (RCRA)
- Safe Drinking Water Act (SDWA)
- Ground Water
- Surface Water

Industrial Hygiene

- VOCs
- Passive Diffusion
- LEED Analysis
- Formaldehyde
- Particulates
- Metals & Solvents
- Lead
- PCBs Building Materials
