Comments

Results for April are under reporting limits. This is the netDischarge Monitoring Report (netDMR) for April. Trichloroethene and Tetrachloroethene are still being misreported on the netDMR as Trichloroethane and Tetrachloroethane, respectively. Since Central Wire cannot change the netDMR, a permit modification was requested of IEPA to correct the permit on December 5, 2013 back to the original permit which set limitations and reporting requirements on Trichloroethene and Tetrachloroethene. Central Wire received the corrected permit on April 8th 2014, as of this submission the corrections to the netDMR have not been made.
