Please base the listing on science

Comments, questions, feedback, suggestions:

Thank you for the meeting. I am a member of the CFAC community liasion panel, but did not find it to be an objective process. I would like to see an EPA-supported community process take place that is objective and based on what the data reveals. Please assist with providing scientific facts to the community. I would like to participate in an EPA-run community process.

I support listing of the site as Superfund rather than alternative.

I am a research scientist with the University of MT and Flathead Lake Biological Station. The station may have useful data for evaluating reference or baseline condition.

Erin Sexton
erin.sexton@umontana.edu

I am interested in trails, river access and recreational development of the site.
